In this table geographic region is determined primarily by undergraduates' parent address. As a result this breakdown will differ from those in other reports such as IPEDS enrollment reports which incorporate citizenship.

For example, a U.S. citizen living abroad is counted in that international region in this table, but would not be counted among international students in other reports that are based on citizenship.

Brown-RISD Dual Degree Program students are included. The program began in 2008.

Most OIR tables count distinct students for the academic year. The exception to this rule is the counting of special students in Tables 8a and 8b, which count student/semesters. Although the default assumption is that a special student is typically here for a semester, a significant number of special students enroll in consecutive semesters. Counting student/semesters takes this variation into account.

* Off campus includes Pfizer special students
