COURSE OVERVIEW

The psychiatry clerkship is designed to be a clinical experience that allows medical students to learn to recognize and manage psychiatric syndromes. By the end of the 6 week rotation you should be able to:

1. Conduct an interview in a manner that promotes information gathering and a therapeutic alliance.
2. Develop a sense of comfort with disturbed patients and patients with chronic psychiatric illnesses, with an awareness of your reactions to these patients.
3. Demonstrate the ability to obtain a complete psychiatric history, perform a complete mental status exam, and recognize significant physical findings.
4. Identify the major psychiatric disorders, e.g., mood and anxiety disorders, psychoses, personality disorders, substance disorders, and disorders involving cognitive impairment (delirium, dementia).
5. Acquire a basic fund of knowledge about these disorders.
6. Formulate differential diagnoses.
7. Develop a plan of further assessment and treatment that addresses medical, psychiatric, and psychosocial problems.
8. Be familiar with the major classes of psychotropic medications, including pretreatment work-up, indications and contraindications, starting and adequate maintenance dose ranges, common drug interactions, and common side effects.
9. Assess and begin emergency management and referral of a patient with psychiatric symptoms.
10. Develop a familiarity with basic psychotherapy concepts.

CLERKSHIP STRUCTURE

LOCATION: You will spend your 6 week rotation assigned to one of 4 hospitals: Butler Hospital, Rhode Island Hospital, the Veterans Affairs Medical Center, or Bradley Hospital.

DIDACTICS: During the rotation, you are expected to leave your clinical site on Wednesday afternoons to attend lectures from 1:00-5:00pm. Depending on which hospital you are assigned, you will also be expected to attend additional seminars (discussed later). **Attendance of seminars is required.**

*****One or two students will be assigned in orientation to bring a relevant clinical case to the second ethics seminar.**

GRAND ROUNDS: On the first Wednesday of every month of your clerkship, you should attend Grand Rounds at 11:00am in Ray Hall, Conference Center, Butler Hospital. No rounds in July or August.

AMBULATORY EXPERIENCE: All students will spend one afternoon weekly in a different setting from their core site. Students can choose to spend their afternoon in psychiatry emergency room settings at Rhode Island Hospital, Butler Hospital, at Bradley Hospital (Child Psychiatry) or a variety of outpatient settings. Students at the VA will spend their afternoon assignment in the outpatient department.

PRECEPTORS: Each student is assigned to a faculty preceptor. Arrange to meet with your preceptor at the beginning of the rotation, and meet at least once a week with him/her. It is your responsibility to ensure that your preceptor observes your patient interviews.

STUDENT CALL: Students at Butler Hospital and Bradley Hospital take call at Butler Hospital's Emergency Room (PAS). You are expected to be on-call 5 times during the clerkship: 4 weekday nights and one weekend day. Please report to Patient Assessment Services (PAS) for call.

On-call hours at Butler Hospital are:

Weekday Call:

5:00-11:00pm

Weekend Call:

3:00-11:00pm

Students assigned to Rhode Island Hospital take call at that site. You are on-call one weekend and four weekday nights during the rotation. Please report to Jane Brown 5 at 8:30am on the Saturday and Sunday of your call weekend.

Students assigned to the VA spend 4 weekday nights on call at Butler Hospital and 1 weekend on call at the VA.

If you cannot do your assigned call for a particular evening or weekend day, it is your responsibility to find a replacement and notify the clerkship coordinator and Jane Brown or PAS at Butler Hospital.

ELECTROCONVULSANT THERAPY- All students are required to observe the administration of electroconvulsant therapy during the clerkship. An observation date will be assigned to each student at the beginning of the rotation.

No more than 2 students should be present on any given morning, but you may swap dates if necessary. Observations will take place at 7:00am in ECT Room 202, 2nd Floor, Center House, Butler Hospital.

If you have any questions or concerns regarding the ECT experience, please contact Kimberly Stamatakos, RN, at 455-6426 on Monday, Wednesday or Friday mornings.

Students rotating at Rhode Island Hospital will observe ECT at that site. It is your responsibility to contact your site coordinator to arrange a date.

MENTAL HEALTH COURT- All students are strongly encouraged to visit a mental health court and are strongly encouraged to attend. Court is held at the Eleanor Slater Hospital and St. Joseph's Hospital on the 7th floor (see map on pages 15 and 16).

Psychiatry Clerkship Case Conference Series

What: The intention will be to help in integrating both your clinical experience on the rotations and the didactic information you are reading and learning.

When: Wednesdays, 4:00 – 5:00 pm. Lunch is provided in the conference room where your seminars are held.

Where: 4th Floor Residency Training Conference Room, Butler Hospital.

Each week, one of you will present a case. The order of this should be decided at the orientation. You should pick a patient you have seen during this rotation, and present them, using your usual history and examinations (in this case, concentrate on the mental status exam) format. It is understood you may not have all the information, but do your best.

Prior to that Friday, preferably on the Wednesday before, the student should let his or her colleagues know a little about the patient—at least the diagnosis that will be presented. The students will be expected to read something about the diagnosis and clinical issues surrounding it.

After the presentation, we will discuss clinical issues surrounding the case. The following questions should be used to structure the discussion:

1. What is the patient's diagnosis?
2. How was this diagnosis arrived at? What symptoms and signs was the patient presenting that resulted in this?
3. What clinical features of this patient are most typical of the diagnosis? What, if any features, are unusual for this diagnosis?
4. Considering the patient as a biopsychosocial whole, what about the patient's history, environment, genetics, etc. was likely to have contributed to the patient getting this diagnosis?
5. What is the likely course of the diagnosis? What aspects of the history or exam suggest a good prognosis? Bed prognosis?
6. What is the current treatment being used? Why was this chosen? How strong is the evidence

for this treatment in this particular case?

7. If the treatment is successful in alleviating the symptoms, what should be done next? Should the patient be continued on treatment? Same or different treatment? How long?

8. If the treatment is not successful, what other options are there for this patient? Are there aspects of the patient that make one or another treatment more likely to succeed or fail?

RECOMMENDED TEXTS

We don't require a textbook. However, it is highly recommended to have some source of info while on the clerkship. The following are recommended text that may supplement your online reading, and help you in better understanding your clinical experience.

Traditional Books

Handbook: Bauer, Mark S., Field Guide to Psychiatric Assessment and Treatment, 1st Edition. Philadelphia, PA, Lippincott Williams & Wilkins, 2003. [--See it at Amazon.com--](#)
a good guide to have with your on service, concise, with lots of good reference tables and lists.

Textbook: Andreasen Nancy, Black, Donald, Introductory Textbook of Psychiatry, 3rd Edition. Washington D.C., American Psychiatric Publishing, INC., 2001. [--See it at Amazon.com--](#)
if there is a gold standard psychiatry textbook for medical students, this is it.

Online Resources

In addition to traditional texts, Brown has a number of online resources as part of the virtual library at Brown. If off-campus you first have to authenticate with your ID and password. Once doing this, navigate to "e-resources at Brown". Under **Find Electronic books**, choose the link for **E-book collections and major texts**. From there choose "**Re-sort by subject**" and look at the **medicine** link. There you can find some useful texts both through Medscape and Ovid.

Medscape:

if you choose the link for Mescap, you will be taken to MD Consult. There, choose the tab for "Books". The books are arranged by subject. Under **Psychiatry**, you will find:

Moore & Jefferson: Handbook of Medical Psychiatry, 2nd ed. , 2004 Mosby, Inc. A very well organized textbook, arranged by disease, and using what should be a familiar medically oriented approach to describing each psychiatric disease.

Jacobson: Psychiatric Secrets, 2nd ed. 2001 Hanley and Belfus. A good, concise handbook style text, arranged in question-and-answer format.

Books @ Ovid:

Kaplan and Sadock's Comprehensive Textbook of Psychiatry, 8th edition by Sadock and Sadock. This is probably the most popular textbook of psychiatry, but very large and probably too comprehensive for a clerkship. Still, if you want the fullest possible information available in a textbook, this is a good place to look.

Child & Adolescent Psychiatry: A Comprehensive Textbook, 3rd edition, by Melvin Lewis. Like the title says, this is a big book concentrating on child psychiatry.

ID BADGES

For security purposes, a temporary staff ID badge must be worn at all times. Your Brown ID is generally acceptable. If you don't have an ID, contact your site coordinator to make arrangements to obtain one.

POLICY ON STUDENT LEAVE

Students are responsible for notifying the clerkship director of any absences and to clear it with the clerkship preceptor before time is taken. Students may have a total of 2 days off on a 6-week clerkship for sick leave or special occasions. Time taken off for professional meetings must be documented with the clerkship director. Students needing additional days off from the clerkship will be required to make up this time.

Students should consider scheduling their core clerkships at times that will not conflict with their program applicant interviews. Students are responsible for making up all days missed from their clerkships due to interviews. Students should notify the clerkship director well in advance of interview days to minimize disruption in the clerkship schedule and to develop a plan for making up the time.

Students missing more than 5 days during a 6-week clerkship will receive an automatic no credit for the clerkship.

HOLIDAYS

Students should contact their site directors to determine whether they will be off, as observed holidays are site specific.

COURSE GRADING POLICY

PRECEPTOR SITE: 80% of your grade will be based on preceptor and resident assessments of overall performance using the standardized evaluation form.

EXAM: 20% of your grade will be based on shelf exam results. A final exam will be given on the last day of your rotation. The exam will take place at Butler Hospital, Residency Training Office Conference Room, from 10:00 am-12:10 pm (unless otherwise noted on your schedule).

If you are unable to take the exam on this day due to scheduling conflicts, please contact Alexandra Morang, Director, Medical Student Affairs, to make separate arrangements at 863-1616.

GRADING CRITERIA

A 75% or greater grade on the shelf-exam is required to attain honors. However, if you receive a score below 75% and the preceptor recommends honors, your grade will be determined by committee on a case-by-case basis.

A 60% (75 test score) or greater is required to attain a passing grade. If you score less than 60% on the shelf exam, you will receive a “remedial” grade and will be required to retake this exam.

BUTLER HOSPITAL
345 Blackstone Boulevard
Providence, RI 02906
Tracey Guthrie, MD
P: (401) 455-6608

Butler Hospital is a freestanding psychiatric facility with a broad range of treatment settings on and off the Butler Campus. The hospital contains a number of specialty inpatient units (ITU) as well as general treatment units (GTU). Regardless of your unit assignment, you can expect to participate in the care of patients suffering with the most common psychiatric illnesses.

OBTAIN KEY/BADGE: Students rotating at Butler will need a unit key to access restricted areas around the hospital. To obtain a key, you must fill out the key sign-out sheet in your orientation packet and give it to the psychiatry clerkship coordinator. Students should pick up their badge in the Human Resources Office at Butler Hospital, Sawyer Building, room 213, 2nd Floor (above the main entrance reception desk).

Please report to your preceptor/assigned unit at 9:00am on the first day of your rotation.

Additional Seminars

On Fridays, you should attend the interviewing seminars from 1:00-2:30pm, given by James Greer, MD. These seminars will take place in Video Studio #364, 3rd Floor Center House, Butler Hospital. (Consent forms are located at the end of this section). Students rotating at Rhode Island Hospital and at the Veteran's Memorial Hospital will attend the interviewing seminars at that site.

Your assigned attending will provide the supervision necessary for you to meet the ten goals of this clerkship. Supervision typically does not cover all fund of knowledge questions that you will encounter on the shelf exam. You are strongly encouraged to supplement your clinical experience with regular studying from the recommended texts.

Most mornings will be spent on the unit. You will be expected to be attentive to all discussions of the attendings' patients and will take an active role in caring for 4 to 6 patients at a time. You will be expected to present a patient to the attending and to intelligently discuss the patient's diagnoses and treatment plan.

Ambulatory Experience

The Patient Assessment Service provides a "front door" function for the Butler Hospital system. Patients are referred to PAS from a variety of sources if it is initially believed that the patient will require a level of care beyond that provided by an outpatient appointment.

The most common sources of referral include general medical hospitals, community mental health care centers, concerned friends or relatives, other mental health care or medical providers, and the patients themselves. You will be oriented to PAS by a staff member, and will then follow a clinician through the initial assessment process. After the case is presented to an attending, you will follow the attending in a re-evaluation of the most pertinent aspects of the psychiatric exam. After observing a few initial evaluations, students should feel comfortable performing the interview independently and assume the role of a clinician.

**VETERANS AFFAIRS
MEDICAL CENTER**

830 Chalkstone Avenue
Providence, RI 02908
Robert Johnston, MD
P: (401) 547-3057
Pager: (401) 452-9794

The student's main role at the VA is to assume a subinternship role, following an average of 3-5 patients on the team.

Student Responsibilities:

For each admission, students are responsible for:

1. Biopsychosocial Assessment (aka Part I) Follow the template on the computer and complete it within 24 hours of admission.
2. Admission orders review – Compare the admission orders with the admission note, outpatient meds, allergies, etc.
3. Physical exam, including the MMSE- Perform within 24 hours of admission.
4. Treatment plan-Cut/paste from the attending note. Update this plan every week, plus on the day of discharge.
5. Physician progress notes-complete these notes three times a week (usually M, W, F), following the template on the computer. Also, write a note any time the patient experiences a clinical status change, plus write a note on the day of discharge.

Patient Discharges

Students also are responsible for the discharge summary. This is typed on the computer (cut and paste from previous notes; be sure to include all assessment components, hospital course by problem, medications at discharge, and appointments) and should be completed within 24-48 hours of discharge.

Schedule

Mornings are spent rounding on patients and writing daily progress notes and orders, while afternoons are often spent elsewhere. You will have one afternoon for lecture, and another afternoon at an outpatient clinic. There is also a weekly interviewing workshop with Dr. Smokler (this replaces Dr. Greer's interview sessions at Butler Hospital).

Psychiatry Grand Rounds occur on the first Wednesday of every month at 11 am at Ray Hall

(Butler Hospital campus). A nationally recognized speaker presents his/her current research. Students give a 5-10 minute informal presentation on any psychiatric topic on the last Thursday of the rotation.

Call

Call requirements are 4 weekday nights and 1 weekend.

1. Weekday night call (5-11 pm) is spent at Butler PAS (Patient Assessment Service=Butler Hospital ER).
2. Weekend call is spent at the VA. Call the VA every few hours to check if new patients have been admitted. If there are new patients, you must go in and perform Part I (Biopsychosocial Assessment) and the physical exam. Otherwise, there is no need to go in unless the on-call attending likes to round with medical students on the weekends (call the attending ahead of time to see if you can round with him/her).

You are expected to be at the site from 8:00 am-4:30 pm on weekdays, unless you are attending clerkship seminars or your longitudinal program.

Directions

Providence VAMC

830 Chalkstone
Avenue
Providence, RI
02908
401-273-7100

From the South:

Take I-95 North to
Exit 22C [Hartford,
CT (RT 10)].
Follow the signs to
Pleasant Valley
Parkway.

At the second traffic light (Chalkstone Ave.) turn left and proceed to the main entrance of the Medical Center.

From the North:

Take I-95 South to Exit 21 (Atwells Ave.)
At the end of the exit ramp, turn right on to Atwells Ave.

At the first traffic light, turn right onto Dean St. which turns into Pleasant Valley Parkway.
Follow Pleasant Valley Parkway through five (5) traffic lights.
At the sixth (6th) traffic light (Chalkstone Ave.) turn left and proceed to the main entrance of the Medical Center.
Exit 22 is closed from the north.

From I-195:

Take I-195 West to Providence and merge right on to I-95 North and follow the directions above.

RHODE ISLAND HOSPITAL

593 Eddy Street
Providence, RI 02903
Lowell McRoberts
P: (401) 444-5228

INPATIENT SERVICE

Please report to Dr. Lowell McRoberts office at 9 am, on the inpatient psychiatric unit at Jane Brown 5 South, on the first day of your rotation.

Students are expected to be on site from 8:00am to at least 4:30pm (except for off-site lectures). You will be assigned to one of the following preceptors: Rendueles Villalba, MD; David Solomon, MD, Gabor Keitner, MD, or Lowell McRoberts, MD.

Medical students doing their psychiatry clerkship at Rhode Island Hospital rotate through the inpatient psychiatric unit in the Jane Brown Building or the consultation service. (An optional experience is available in the Partial Hospitalization Program and the Acute Psychiatry Service). The inpatient psychiatric unit services patients with primary psychiatric conditions, neuropsychiatric disorders and med-psych co-morbidities. The Partial Hospitalization Program offers students an opportunity to observe and possibly participate in the treatment of acute outpatients.

You will manage a caseload of 4-6 patients with the close supervision of an attending psychiatrist. You will be expected to perform clinical interviews and physical exams, to write admission and daily progress notes, and to dictate discharge summaries. You are encouraged to take an active role in your education by requesting periodic feedback regarding your performance.

CONSULTATION SERVICE

The consultation psychiatry service at Rhode Island Hospital consists of an attending physician (Dr. Harrington), a nurse clinical specialist, rotating psychiatry residents, rotating neurology and medicine residents, and third and fourth year medical students. Rotating residents and students are asked to assess and treat a wide variety of psychiatric and neurobehavioral problems in medically, surgically, and neurologically hospitalized patients.

After a one to two day introduction to the service, medical students and residents are asked to review charts and evaluate patients on an individual basis during morning hours.

Rounds with the attending psychiatrist and the consult team typically begin at 12:00/12:30 for review of new cases. Follow up of active cases for further diagnostic assessment (appropriate lab

work, neuroimaging studies, EEG, neuropsychological testing, etc) and evaluation of treatment interventions is an important component of the consultation service.

Residents are expected to give a presentation on a topic of their choice at the end of their rotation – this is an optional requirement for rotating medical students. This is an active teaching service. Relevant literature is reviewed on a case-by-case basis. Medical students and residents are encouraged to take an active/leading role in the follow up and management of their cases. This service offers a team approach to the psychiatric evaluation and management of hospitalized and emergency room patients. The team consists of an attending psychiatrist, clinical nurse specialists, geriatric psychiatry fellow, resident, psychology intern, and medical student.

The day begins with morning check-in. Patients are then seen individually for follow-up, and for initial evaluation. At afternoon walk rounds, cases are formally presented and discussed.

The trainee is not expected to know how to evaluate the medical/surgical patient at the start of the rotation, but will learn how to interview and examine such patients, write consultation reports, and provide meaningful follow-up during the course of the rotation.

**Rhode Island
Hospital**
593 Eddy Street
Providence, RI 02903
401-444-4000

Heading North on Interstate 95:

When traveling north on I-95, take exit 18. Bear left at the end of the exit onto Thurbers Avenue. At the first traffic light, take a right onto Eddy Street. After approximately 1 mile, you will come to light at the intersection of Eddy and Dudley streets.

To reach the Main Building or Jane Brown, continue straight through the light and take a left into the main entrance.

To reach other points on campus, such as the Cooperative Care Center, Medical Office Center, Davol emergency department, Hasbro Children's Hospital or the APC Building, take a left onto Dudley Street and follow the signs.

Heading South on Interstate 95:

When traveling south on I-95, take exit 19 and bear right. At the end of the exit ramp there is a traffic light at the intersection of Eddy and Dudley streets. To reach the Main Building or Jane Brown, take a right at the light and take a left into the main entrance.

To reach other points on campus, such as the Cooperative Care Center, Medical Office Center, Davol emergency department, Hasbro Children's Hospital or the APC Building, continue straight onto Dudley Street and follow the signs.

From Route I-195 West:

Take I-195 West to 95 South. Move into the right-hand lane right away and take exit 19. Bear right while on the exit ramp to the intersection of Eddy and Dudley streets. At the intersection, you will see the hospital campus directly ahead. Follow the signs.

Bradley Hospital
1011 Veterans Memorial Pkwy
East Providence, RI 02915
401-432-1000

Parking

Parking is available to the right of school once you enter the driveway.

Directions

From Points North, South or West

From Interstate 95, take Interstate 195 East to Exit 4. Keep right on the ramp to Veterans Memorial Parkway. Continue 2.5 miles. Bradley Hospital is on the right at the traffic light.

From Points East

Take I-195 to Exit 6 (Broadway). Take left (south) onto Broadway. Turn left at end of road, continue on Veterans Memorial Parkway to first traffic light. Turn right onto Bradley Hospital campus.

The Miriam Hospital

164 Summit Avenue
Providence, RI 02906
401-793-2500

Department of Psychiatry

2nd Floor Fain Bldg, Suite B
(office building, across from the Emergency
Department)
793-4300

Parking:

Two-hour parking is available on the side streets surrounding the hospital.
Public parking is available in the Summit Avenue lot across from the main entrance.

Directions

From Points North: Take I-95 South to Exit 25 (North Main Street). Go left off the exit. Follow straight through traffic light and bear right around one way. At first stop sign, take left. At traffic light, take left onto North Main Street. Take second right onto 5th Street. Take left onto Summit Avenue. The hospital is located on left.

From Points South: Take I-95 North to Exit 25 (North Main Street). Take first of the two sub-exits (before bus station). Follow to traffic light. Take left onto North Main Street. Take second right onto 5th Street. Take left onto Summit Avenue. The hospital is located on left.

From Hope Street: If you are traveling north on Hope Street, toward Pawtucket, turn left onto Fifth Street. If you are traveling south on Hope Street, toward Providence, turn right onto Fifth Street. When you reach the intersection at Summit Avenue, The Miriam Hospital main building will be ahead to your right and the Norman and Rosalie Fain Health Centers will be on the left.

From Interstate 195 West: I-195 West merges with I-95 in Providence. Approaching the north-south split, bear right onto I-95 North. Immediately get into the left-hand lane and follow I-95 North to exit 25. Follow the signs to North Main Street. When you arrive at the North Main Street traffic light, turn left. Proceed two blocks to Fifth Street. Turn right onto Fifth Street. As you drive

up the hill, The Miriam Hospital main building will be on the left and the Norman and Rosalie Fain Health Centers will be on the right.

From Route 146 South: Take the Branch Avenue exit and bear left at the light. Follow Branch Avenue to North Main Street, merge and bear left. Take a left at the light and follow North Main Street through two lights. After the second light, take the second right onto Fifth Street. As you go up the hill, The Miriam Hospital main building will be on the left and the Norman and Rosalie Fain Health Centers will be on the right.

Directions to the Eleanor Slater Hospital

John O. Pastore Center

Regan Building
462-3085

FROM PROVIDENCE:

Take Route 95 South

Take Exit 14 onto Route 37 West

Take first off ramp (0.4 miles) “Pontiac Avenue, Howard Center”

Turn left at light on Pontiac Avenue and

proceed to Howard Avenue (0.8 miles)

Turn right onto Howard Avenue

Continue for 0.3 miles until you see a sign
on the right for Eleanor Slater Hospital

Take a right into the parking lot

The main entrance to the Eleanor Slater Hospital directly faces you. (The entrance
is marked Regan Building.) Use the
parking lot of Adolph Meyer Bldg. The court is in the basement of the bldg.
