

SOLAR PONDS

JUNE 1982
Wm. Meade

TABLE OF CONTENTS

| | | |
|-----------|---|----|
| Chapter I | Introduction | 1 |
| II | Principles of Solar Energy | 8 |
| III | Solar Ponds (Technology) | 14 |
| | -Non-Convecting Ponds | 15 |
| | -Convecting Ponds | 19 |
| IV | Solar Ponds (Physics) | 21 |
| | -Response to Solar Radiation | 21 |
| | -Three Zone Configuration | 25 |
| | -Zone Boundaries | 26 |
| | -Internal Dynamic Stability | 29 |
| | -Modifying Salinity Profile | 31 |
| | -Thermal Characteristics | 34 |
| V | Considerarions | 40 |
| | -Design | 40 |
| | -Construction | 43 |
| | -Materials and Components | 45 |
| | -Site Requirements | 49 |
| | -Maintenance | 54 |
| | -Environmental Impact | 58 |
| | -Economics | 59 |
| VI | Salt Resources | 65 |
| | -Ocean Water | 66 |
| | -Saline Lakes | 67 |
| | -Saline Playas or Salt Flats | 74 |
| VII | Solar Ponds (Applications) | 79 |
| | -Thermal Apl_ications | 79 |
| | -Agricultural and Industrial Processes | 84 |
| | -Electrical Generation | 86 |
| | -Desalination | 92 |
| | -Salt Production | 93 |
| VIII | Conclusions and Discussions | 99 |
