'08 Colloquium**

BROWN

Biology of Human Aging

SPONSORED BY:

Center for Genomics and Proteomics
Center for Gerontology and Health Care Research
Department of Molecular Biology, Cell Biology and Biochemistry
Department of Ecology and Evolutionary Biology

Steven Austad

Barshop Institute for Longevity and Aging Studies
San Antonio, TX
10:00 AM

**Bats, Cats, and Rats: How studying Unusual
Species Can Help Us Improve Human Healthspan**

Alessandro Cellerino

Fritz Lipmann Institute for Age Research
Jena, Germany
11:00 AM

Studying Mechanisms of Aging in a Short-lived Fish

Andrzej Bartke

Southern Illinois University School of Medicine
Springfield, IL
2:00 PM

Insulin Signaling in Long-lived Mice

Nir Barzilai

Albert Einstein College of Medicine
Bronx, NY
3:00 PM

**Strategy to Prevent Age-related Disease
Through Genetic Approaches**

Monday, May 19th, 2008

**All lectures will be held in the
Laboratories for Molecular Medicine
70 Ship Street, Providence, Room 107**

Coffee: 9:30 AM Reception: 4:30 PM
