## **6. Research in Progress (2006):**

*Packard Foundation*, Co-Principal Investigator (Principal Investigator: David Lindstrom). "Research for Improving Reproductive Health in Ethiopia." (7/1/04 – 6/30/07), \$450,000.

This grant is to collaborate with Jimma University on (a) a five-year longitudinal study of the lives of 2100 male and female adolescents in Jimma Town, two semi-urban towns, and rural areas, and (b) a nationwide cross-sectional survey of adolescent life, health, and reproductive health. The objectives of the study are (a) to produce reliable and timely estimates of demographic events over time (school exit, labor force participation and work, family formation, and health), (b) identify how the local system of social stratification, opportunity structures, family and kin resources, and social networks affect the transition to adulthood), and (3) assess the effect of current program activities, and to develop policy interventions and assessments to improve the reproductive health of adolescents as they become adults.

*NICHD*. Principal Investigator (Co-Investigators: Roger Avery, Fran Goldscheider, Michael Msall). "Child Disability and the Family." (4/1/99 – 3/31/06), \$850,000 (with supplements).

This project brings an interdisciplinary team from Brown to join NICHD's Family and Child Well-being Research Network to strengthen studies of family and child health. This team studies disability among school-aged children- the measurement of disability among children, differentials in its antecedents, in medical services and rehabilitation inputs, and on the consequences of child disability for the well-being of disabled children, children who are not disabled but have a disabled sibling, and for the parents.

*Compton Foundation.* “Building the Infrastructure for Policy-Relevant Population Research in Ethiopia.” Co-Principal Investigator (Principal Investigator: David Lindstrom (9/1/97-6/30/06), \$127,525.

In its initial stages, this project built the infrastructure for policy-relevant population research in Ethiopia, by fostering research collaboration between the PSTC and the DTRC of Addis Ababa University and Jimma University. The current award builds the infrastructure for demographic health research at Gondar University.

*William T. Grant Foundation.* “The School-to-Work Transition for Adolescents with Disabilities.” Principal Investigator (Co-Investigators: Gary D. Sandefur and Michael E. Msall). (7/1/04-6/30/06), \$179,885.

This study performs secondary analyses on data from the National Longitudinal Study of Youth to examine factors associated with more and less successful transitions from school to work or advanced education for youth with disabilities. Particular attention is paid to the roles of family structure, school type, and community and school resources.

*National Science Foundation.* “State Interventions in Successful Transitions to Adulthood.” PI-Subcontract. (University of Iowa, Kevin Leicht, PI.). (7/1/06-6/30/08), \$127,000.

This project uses three cohort longitudinal studies of the transition to adulthood for adolescents in the 1970s, 1980s, and 1990s to (1) define and describe the successful transition to adulthood in terms of capital accumulation, attainment of economic security, and partnership and life satisfaction, (2) identify group and individual disparities in successful transitions, defined by ascribed characteristics, family resources, and personal circumstances, and (3) measure the impact of the social and economic environments where these transitions occur and the effects of state structures and policies on the successful transition to adulthood, specifically examining whether the impact of these state policies differs by race/ethnicity, immigrant status, and disability status.

*Spencer Foundation.* “State Re-Development Programs, Education, and Equal Opportunity.” Principal Investigator. (Kevin Leicht, Co-Investigator). (7/1/06-6/30/08). \$40,000.

This project uses data from two longitudinal studies of the transition to adulthood for adolescents born in the 1970s and 1980s to examine the effects of state re-development policies on educational opportunity and achievement.

*NICHD.* “Characterizing Out-of-School Child Care Use among School-Age Children with Disabilities: A Timely Exploration.” (Dennis P Hogan, Co-Investigator; Principal Investigator: Peter D. Brandon). (1/1/05-6/30/07), \$100,000.

This study uses longitudinal population survey data from the Survey of Income and Program Dynamic to investigate out-of-school child care utilization among children with disabilities.

*Brown University Office of Vice-President for Research.* “Exceptional Children—Exceptional Challenges: Developing an Interdisciplinary, Multidimensional Project for Studying Work-Family Dilemmas among Parents Raising Children with Disabilities.” (Dennis Hogan, Susan Short, Anna Aizer, Peter Brandon, Michael Msall, Patrick Heller). (4/1/06-3/31/07), \$81,600.

This pilot project will undertake preliminary research and intensive planning for studies of the prevalence and types of child disability, the choices families make to meet conflicting family economic needs and time constraints, and the relative public and private costs of raising children with disabilities. The emphasis is on analyses that contrast and compare societies that systematically vary on one or more of these dimensions. First, to demonstrate the feasibility and merits of a comparative approach, this seed proposal requests funds to develop a U.S.-Australian comparison analysis of the work/family dilemma in families raising children with disabilities in Australia and the U.S. as these are associated with variations in public support for child care, welfare-to-work programs, and programs for children with disabilities. Second, the seed grant will support efforts to identify, across several nations, longitudinal studies of children with disabilities that include information on maternal employment and child care, to forge linkages between Brown University and the Principal Investigator of each of the studies, and to assemble a collaborative working group at Brown University to seek funding for comparative analyses. Third, we will write a Program Project application to NIH for five years of research support for the activities of an Interdisciplinary, Multinational Project to Study Work-Family Dilemmas among Parents Raising Children with Disabilities.
