

TABLE 1. Identification of *Neisseria* and *Branhamella* species with the Rapid NH system and CPPA carbohydrates

Organism	No. tested	No. (%) <sup>a</sup> identified with:	
		Rapid NH system	CPPA carbohydrates
<i>N. gonorrhoeae</i>	162	162 (100)	160 (99)
<i>N. meningitidis</i>	28	28 (100)	26 (93)
<i>N. lactamica</i>	5	5 (100)	5 (100) <sup>b</sup>
<i>N. sicca</i>	7	4 (57)	7 (100) <sup>b</sup>
<i>N. subflava</i>	10	8 (80)	10 (100) <sup>b</sup>
<i>N. mucosa</i>	5	5 (100)	5 (100) <sup>b</sup>
<i>B. catarrhalis</i>	23	23 (100) <sup>c</sup>	23 (100) <sup>b</sup>

<sup>a</sup> The total percent identified was 98 for both the Rapid NH system and CPPA carbohydrates.

<sup>b</sup> Supplemental tests were necessary for definitive identification.

<sup>c</sup> This code was common to other organisms. The isolate was confirmed as *B. catarrhalis* by examination of Gram stain morphology.
