Form #X03

## Procedure Utilized By IT Personnel to Obtain Information Referenced in the "Request for RELEASE OF STUDENT COMPUTING DATA" Form

---

1. Requester verifies the need for the request. It is the requester's responsibility to verify that the non-Brown individuals who need the information are who they say they are (a student's next-of-kin, a legal guardian, etc.). The IT authorized representative is acting on behalf of the requester and providing technical support only. Responsibility for decisions about what information is released rests with the requester. Questions regarding legal aspects of a request should be directed to the Office of General Counsel prior to making a technical request.
2. IT representative (authorized by Department Head) receives a completed and signed form.
3. IT representative (maintaining confidentiality to the extent possible) ensures that information requested is gathered and preserved in a way that is acceptable to the requester. Generally, the information will be provided on a CD (or other portable media) - or, if requested, the information stored on servers (e-mail, centrally stored files, etc.) can be restored to a computing system before the system is released to the authorized party.
