We are starting lot 2

Depth measurements at end of lot 1:

For this level, we will try to level the units off at 20cm

At the end of this day's excavation, we have reached 20cm on the ~~west~~ east side of the unit but have not completed the unit.

After screening we have found charcoal, coal, clear glass, quartz, possible shell, lime stone, possible slag, ceramic earthenware with white glaze, pumice, and ceramic redware.

FBC - A3 10-2-06 Chase & Valerie

Finished 2nd lot

.75 x .75 pit in the NW corner of the original pit.

The day was difficult b/c of several roots & rocks ~~hidden~~ hidden in the dirt. We reached a depth of 22 cm in the SW corner. The soil is a dark brown & is very loose. We found a total of 16 items

located in one bag

- 5 pieces of ceramic
- 5 pieces of glass
- 2 pieces of brick
- 3 pieces of iron
- 1 pipe stem

The soil @ the beg. of the day was moist & as the digging progressed we found dirt that ~~was~~ was drier.
