

The background of the slide is a dark, atmospheric landscape. The sky is a deep blue with some lighter, hazy clouds. In the foreground, there are dark, silhouetted hills or mountains. The overall mood is mysterious and evocative.

Erich von Däniken organized several expeditions to various places on the globe, which contain mysterious artifacts of incomprehensible technologies. The preparation of such expeditions is crucial.

Whenever Erich von Däniken and his team commence an expedition, the team is focused is on a clear objective. Risks are evaluated and information on geography, security and available archeological artifacts are carefully studied. Often local mythologies give crucial hints to the expedition team on its fact finding mission.

Däniken makes use of all available information on potential locations. Often aerial photographs taken by satellites contribute valuable information on remote sites. However, beside such high-tech information sources, century old documents and books prove to be valuable in the search of artifacts supporting the theory.
