

A Better Way to Pay Patients

Better Retention. Better Performance. Better Trials.

9 out of **10** sites:

would recommend the ClinCard

would use the ClinCard again

that use the ClinCard see an ROI in less than 6 months

ClinCard is the only patented payment technology designed to simplify patient reimbursement and enhance the overall clinical trial experience.

Remove Barriers to Patient Participation

ClinCard provides rapid reimbursement, eliminating the financial hurdles that may keep participants from completing a clinical trial. It accelerates the process by providing patients with instant access to cash via a reloadable debit card. The ClinCard portal also allows sites to send out automated alerts for appointments in each patient's native language, keeping them engaged and on schedule throughout the study. This combination of real-time patient reimbursement and personalized patient messaging is proven to increase patient retention.

Optimize Workflow Efficiencies

ClinCard simplifies complex patient reimbursements reducing administrative frustrations and time-consuming processes.

By automating and streamlining the payment process, ClinCard eliminates administrative burdens and manual errors, further supporting a truly patient-centric clinical trial.

Better for Sites.
Better for Patients.

"The Greenphire team are experts and understand the complexities of clinical trial payments."

- ClinCard Site User

Gain Financial Transparency and Control

ClinCard securely centralizes all transactions, providing access and visibility to a complete audit trail of every patient reimbursement. With a powerful web portal, sites get better data and complete financial transparency. The solution is configurable to each study's protocol.

ClinCard Improves:

Patient retention, engagement and satisfaction

Operational performance

Workflow efficiency

Payment accuracy

Financial transparency & control

Greenphire's exclusive focus on optimizing payment processes for sites makes them the partner of choice for more than 500 clients, including 9 of the top 10 pharmaceutical companies, and has facilitated more than 3 million patient reimbursements.
