1) The verification ID field on the User Details screen has been renamed to User Profile ID.

2) Reminder: Brown’s Pcard policy **prohibits** the purchase of item or materials that are subject to the ITAR and are enumerated on the U.S. Munitions List.

- **What is ITAR and the U.S. Munitions List?**
  
  ITAR stands for the *International Traffic in Arms Regulations*. These are federal regulations administered by the Directorate of Defense Trade Controls under the U.S. Department of State. The ITAR governs all military, weapons, and space-related items and services enumerated on the **U.S. Munitions List (USML)**.

- **How do I know whether technology or materials I am purchasing are controlled under the ITAR?**

  While most items that are purchased for use at Brown are not subject to the ITAR, researchers may want to purchase technology that could have a military application. In addition, the ITAR controls certain military-related chemicals, chemical agent precursors, propellants, explosives and energetic materials. If you are asked to purchase technology or materials and need help determining whether they are ITAR controlled, please contact Juliane Blyth or Rebecca Haworth in the Office of Research Integrity (ORI) for assistance.

  Visit ORI’s [website](#) for additional guidance and resources, including a [list of items](#) that are highly controlled and may be used at a university.
