Connection
PUBLIC SECTOR SOLUTIONS
we solve IT™
We are a financially stable, Fortune 1000 company

We offer complete solutions and services designed to improve operations and increase the value of IT

We employ the most highly trained, experienced IT professionals in the industry

We strive to understand your needs and to create solutions that adhere to your requirements and budget

We serve as a trusted extension of your IT staff

We are relentless in our commitment to exceeding your expectations

We share the E&I mission to help optimize supply chains, reduce costs, and drive operational efficiency throughout the educational community

SINCE OUR FOUNDING in 1982, Connection has set the standard for customer service in the IT industry. We strive to create a foundation for long-lasting and rewarding partnerships. We offer expert guidance, exceptional service, and innovative strategies to empower you to make informed IT investment decisions.

A collaborative approach to the design, deployment, and support of technology has fueled Connection's growth and earned us the reputation of trusted advisor to our customers.
E&I and Connection

YOUR SOURCE FOR COMPLETE TECHNOLOGY SOLUTIONS AND SERVICES

E&I’s competitively awarded Connection contract for computer hardware, software, peripherals, and services grants access to more than 300,000 computer systems and peripheral products from hundreds of manufacturers, as well as to Connection’s solutions services.

We specialize in satisfying the unique IT needs of educational institutions from design to deployment. Our extensive experience managing contracts provides the expertise and knowledge to adequately address the various needs facing IT procurement professionals. Customer requirements are fulfilled efficiently through a variety of purchasing mechanisms that result in accurate billing and shipment support documentation. Call 1.800.986.2289 today for eligibility requirements.

Agreement Highlights:

› Significant discounts on Lenovo desktops and notebooks, as well as many other popular computer brands
› Access to more than 300,000 peripheral products from hundreds of manufacturers
› Shipping included within the contiguous U.S.
› Sophisticated Web-based services
› eProcurement
› Online ordering through dedicated E&I website—features include:
  › Product and technical information
  › Billing information
  › 24/7 product and account information
  › Smart Selectors—system, network, monitor, printer, and camera selectors compare up to 5 products and their features
  › Memory configurator
  › Order tracking

IT Managed Integration Services and Staff Augmentation:

› Contract Number: CNR01350
› Contract Term: 3/1/2014–2/28/2019 (with option of one 5-year renewal)
› Agreement Highlights: IT Managed Integration Services and Staff Augmentation (i.e., Professional Services via a Statement of Work (SOW), along with any other labor and associated services, such as asset tagging or asset disposal and redeployment)
› Call 1.800.986.2289 today for a proposal.

For More Information and to Place Orders:
Connection
Phone: 1.800.986.2289
Fax: 1.603.683.2482

Online: www.connection.com/eandi

Always identify yourself as an E&I member when requesting a quote or placing an order and reference Contract Number CNR01141 (for IT Managed Integration Services and Staff Augmentation reference Contract Number CNR01350).
LEADING NATIONAL SOLUTIONS PROVIDER—Connection has been trusted by educational institutions for decades. We help design, enable, manage, and service IT environments to optimize learning. Our teams foster deep relationships around a solutions approach and exceptional service to bring classrooms into the 21st century.

QUALIFIED—Our Account Managers and technical experts are ready to assist you with a complete range of services across key technology areas: Converged Data Center, Cloud, Security, Mobility, Networking, Software, and Lifecycle. With extensive vendor partnerships and a broad selection of over 300,000 products, Connection combines the professional services, technical expertise, and purchasing power you need for any size project.

EXPERIENCED—Our extensive experience serving the education marketplace ensures we can identify and apply the right purchasing vehicles to equip your institution with the right tools to help students thrive and inspire teachers. We continuously expand cooperative purchase partners and our coverage with new contracts, as well as manage a broad E&I schedule. For open-market purchases and transactions where no contract vehicle is in place, you can count on highly competitive pricing.

PROVEN—By navigating the technology landscape for every facet of schools—from K-12 levels to higher education—we employ IT for better outcomes. Connection delivers value through in-depth expertise, savings, and outstanding service.

Connection has the solutions and services your institution needs to make the most of your technology budget. We can design and implement cost-effective, cutting-edge IT solutions throughout your environment. Our experts can help you improve faculty effectiveness and stimulate student learning with innovative education IT solutions.

Your Trusted IT Partner
SOLUTIONS FOR THE 21ST CENTURY

Connected Classroom

As a leading National Solutions Provider, we connect people with technology that enhances growth, elevates productivity, and empowers innovation. Our Technology Solutions Group will partner as an extension of your team to:

- **Enhance Your Growth**
  Let us customize your solution, and then help you extract the full value from your IT investments.
  We help our customers leverage technology so that they can offer an environment that provides a better education. Our Assess, Design, Implement, and Manage (ADIM) approach ensures we fit the best solutions for their unique requirements.

- **Elevate Your Productivity**
  Leverage the know-how of our team, so you can implement IT that improves your service levels.
  The work we do helps our customers improve their data centers and IT operations. We enable IT teams to deploy innovative, time-saving solutions to increase productivity, agility, and speed so that their institution can better serve teachers and students.

- **Empower Your Innovation**
  Partner with us and discover new ways to increase the ROI of your investments.
  With our guidance, customers break free of the paradigm where 70% of IT budgets go to maintenance. We deploy innovative approaches to IT challenges—flash storage, hyper-converged infrastructure, and cloud computing—that optimize IT operations.

Why Connection?

Every successful engagement begins with trust. Our teams engage customers with a solutions approach that fosters deep relationships based on trust and exceptional service. We help customers navigate the technology landscape and address their changing needs and challenges, on time and on budget. Everything we do is geared toward meeting your needs today and planning for your needs tomorrow.

**Results through Quality ADIM Methodology**

Our teams are trained to assess, design, implement, and manage technology with industry-leading methodologies. This comprehensive approach ensures your technology solutions:

- Maximize your efficiency and cost savings
- Are tailored to the exact needs of your environment, users, and goals
- Leverage the latest technologies available
- Continue to deliver the results you want day after day, month after month
Our Expertise
Connection has qualified experts and experience implementing a breadth of data center solutions for customers of all sizes across diverse industries. Our Converged Data Center Services make it easy to adopt and implement the industry’s highest performing infrastructure technologies to keep data centers running efficiently and effectively. Resources can be allocated and used based on analytics whereby workflows and workloads are directed to best serve the organization at any particular point in time. When optimized, new levels of agility and flexibility across all domains of the data center including servers, virtualization, and storage are possible. This is the era of the software-defined data center, and our team can help you realize both the vision and the benefits.

Private and Hybrid Cloud
An on-premises virtualized data center, built by your organization and run by your organization, can be upgraded into a private cloud environment. A true private cloud environment builds from traditional server virtualization and offers distinct attributes of cloud models: pools of compute resources, broad access to data, rapid scalability, self-service provisioning, and the ability to measure usage. Integrate that capability with an off-premises, hosted cloud solution, and organizations can benefit from expanded resource pools for burst, proximity, and budgetary benefit.

Converged Infrastructure
Integrated server, storage, networking, and virtualization platforms are emerging as the modern option for maximum performance and cost efficiency to address today’s demanding workloads. Let our team lead you through the planning, integration, and guide the implementation of one of these high-performance platforms to better serve your organization.

Data Protection and Business Continuity
Insulate your operations and your users from technology failures, natural disasters, and unplanned outages before you have to recover from an unexpected event. Our experts will design a world-class business continuity plan to keep your most critical systems and workloads available—even when disaster occurs. Our team can help you assess the factors to consider how to design your plan and the best technology to implement to achieve continuity in your systems and, more importantly, across your entire infrastructure.

Enterprise Disk Arrays and Storage Networking
An organization’s data is one of its most valuable assets. The need for efficient, reliable, and cost-effective storage solutions has never been greater. Our team of experts can ensure that you leverage the right storage tiering, classification, and investments to fuel your infrastructure with the data it needs to operate. Whether you want to build a new storage environment or add to an existing one, we can help.

Server and Desktop Virtualization
To develop and roll out a virtualization strategy that helps you maximize data center efficiency and user satisfaction simultaneously is a monumental challenge. Our team of experts has implemented virtualized data centers for customers of all sizes and with widely varied requirements. Whether you start with our virtualization workload assessment, adopt end user computing virtualization, or pursue a software-defined data center vision, let our experts lead you with strategies proven to maximize your investment.

For more information, visit www.connection.com/DataCenterPractice-ps
Our Expertise

Connection has qualified experts with years of experience who provide a personalized engagement with customers to build the right hybrid and public cloud solutions. Our team helps you discern the factors that should drive the identification and prioritization of providers that can best host your workloads. Combine the attributes of public cloud capacity with high-performing network connectivity and the option to co-locate legacy or proprietary hardware, and optimal possibilities evolve. That’s where our team excels—we give you options for delivering a next-generation IT strategy.

Cloud Storage and Disaster Recovery

With an on-premises data center connected to the storage pools or replication services of a public cloud provider, you get a tiered and resilient data protection strategy. Whether your goal is redundancy, primary off-site storage, or a new storage pool for the delivery of a new application, our team will design a solution to accomplish every facet with one of our many public cloud storage partners.

Desktop as a Service (DaaS)

Don’t be intimidated by the idea of mobile workforce computing solutions powered by VDI technology. We will simplify it for you. Our team can help you identify the best platforms, approach, and implementation strategy to put the power of hosted desktops to work for your users.

Unified Communications as a Service (UCaaS)

Any technology adopted over the past two decades is now obsolete or will be very soon. The traditional PBX phone system is a perfect example. As organizations seek to replace their aged communication infrastructures, they quickly realize that new ways of delivering telecommunication technology can enhance employee productivity and the user experience. Our cloud team can guide you through the transition. Let us lead the process to evaluate and implement a hosted UCaaS solution that will meet your unique needs.

Infrastructure as a Service (IaaS) and Platform as a Service (PaaS)

Any organization on a path to fully migrate to the cloud or a new platform to build their next application must make critical decisions. It begins with consideration of the SMAC stack (social, mobile, analytics, and cloud). Our team is well versed in this area and prepared to help navigate the factors that will lead to proper selection—the right architecture and the most appropriate provider.

Connectivity

To develop and implement a connectivity strategy that provides users and applications with the bandwidth and redundancy to keep your organization running is a daunting task. Couple that challenge with the ability to keep costs under control and manage the network interface effectively, and you face a substantial challenge. Our team has helped customers design resilient, cost-effective networks regardless of environment size or requirements. Put our knowledge to work for your organization.

Colocation

Colocation can provide you with additional or alternate space in which to run your most critical workloads. Our tier 3 colocation data center providers can deliver high fidelity data center capacity through managed data center services for your equipment. Need a better, safer, and more resilient environment? We can help you find the right facility in the right location to meet your needs.

Our Expertise

With the continuous state of change in the global threat landscape, organizations face cyber-attacks and security breaches that are growing in frequency and sophistication every day. Our Security Practice offers solutions and services to counteract increased risk proliferation. Based on your organization's needs, environment, processes, and security goals, our experts will provide insights to help you implement the right solutions to address your critical risks and protect your operations. As an extension of your IT team, we're committed to keeping our nation's government operating safely and securely.

Security Assessment and Audit

Our Security Assessment and Penetration Testing Services help prioritize where you should focus resources to reduce overall risk. We will help you better understand today’s real-world threats and how they could affect your organization. A Penetration Test can uncover a myriad of vulnerabilities in any environment. It helps highlight which vulnerabilities are exploitable, which risks are critical and therefore need to be addressed with a high priority, and which items must be remediates over time. Our team identifies and understands the vulnerabilities that exist in your environment, then works with you to develop a prioritized plan to bring that risk in line with acceptable levels in accordance with compliance-based security requirements such as HIPAA, HITECH, ePHI, PCI, GLBA, and FISMA.

Security Suite Optimization

Industry data shows that more than 30% of all software security solutions are acquired in suites to aid in the unification and implementation of security policies. In other words, where one mechanism leaves off—another one immediately picks up. Since security can often be a mix of investments from multiple vendors, we frequently see areas where coverage cannot be extended and also examples where integration between vendor's products is less than ideal.

In this engagement, our team works with you to determine and document your security risks, outlines gaps in security coverage and protection, and advises you on the correct steps to take to address these risks. Our team can help ensure that whether you're using one or multiple security providers, your environment is adequately configured and provides the protection, visibility, and oversight that your organization, users, and data require. This “Unified Security Stack” is the goal based on principles of uniform policy implementation, complete coverage and seamless security protection.

Security Governance, Risk, and Compliance

A multi-step process is needed to develop and implement a comprehensive security management plan. The first step is to have a solid understanding of your environment’s security risk level. Let our experts help you identify and document all policies and controls. Then we will help validate an ongoing process to maintain compliance with those policies over time. Our team draws on years of experience and stays abreast of current threats in order to help you develop a well-documented, well-defined security program from investigation to implementation.

Managed Security Services

Does your organization know where it stands in relation to company policies and compliance controls, 24 x 7 x 365? Does your security infrastructure provide you the protection, visibility, and oversight to manage security events? Our Security Practice utilizes a proven process and industry-leading tools to continuously monitor and manage your environment. Our team will give you an accurate picture of your risk and a solid foundation to continuously protect, detect, and react to today’s sophisticated and constantly evolving security threats.

For more information, visit www.connection.com/SecurityPractice-ps
Our Expertise

Connection works with customers to extend their on-premises and on-campus IT infrastructures to the mobile experiences that today’s organizations require. Our team can work with you to ensure that the necessary network infrastructure is in place all the way through to securing the data on each device to prohibit unnecessary or unacceptable risk.

Whether your requirements are small or large, we can help you develop the right solution with products and services best suited for your mobile device environment. We support the mobile computing needs of a workforce and students increasingly on the go. We offer custom configuration, imaging, delivery, and enhanced security solutions for mobile data and devices.

Mobile Readiness Survey
A successful on-campus mobile project is reliant on the wireless network that will support it. Let our team perform a full site survey to help you map out where you have the coverage necessary to succeed and where upgrade or extension of that network will be necessary to achieve your goals. Our team will architect a solution for you based on our findings and can deliver the full implementation for you to ensure that you don’t under or overestimate what’s required.

Mobile Device Management
Whether you are going with a government-owned device strategy or an end user-owned device strategy, you will need to ensure that the registration process and security policies properly govern those devices as they traverse proprietary and other host networks. Ranging from application delivery and device management policy all the way to user-level restrictions, our team can ensure that your MDM project is a success from day one.

Mobile Device Security
The first step in any mobility initiative is to ensure proper security, protect data, and comply with regulations. With so many different devices, products, and methods the choices can seem complex. Our team of specialists can simplify the process and help you deliver Mobile Content Management (MCM) solutions. With MCM, you can trust secure document distribution and mobile access to documents through a native mobile app. Let us help you sort through the complexity with our diverse knowledge of today’s market and products, so your community can securely access valuable government resources.

Mobile Deployment Services
Deploying a large number of mobile devices over a large diverse geography can stress the limits of your IT organization and be very costly. Our warehouse and configuration center makes this a budget-friendly and simple exercise with the expertise to provide an ongoing sustainable solution.

For more information, visit www.connection.com/MobilityPractice-ps
Our Expertise

Connection has qualified experts with experience building the right networking solutions for thousands of customers. Let our in-house experts help you build a complete IT infrastructure with a solid foundation. Our services address network efficiencies, collaboration requirements, increased speed, and greater productivity. In-depth assessment, documentation, consultation, design, planning, installation, and management services are available for all networking solutions.

Network Architecture

A secure, reliable and resilient network is crucial for any entity operating in today's technology-driven world. Our Network Practice can help you develop a clear understanding of the capabilities and shortcomings of your existing infrastructure and chart a plan for remediation.

Engagement goals include:
- Understand existing network infrastructure
- Find new ways to expand capabilities
- Leverage current investments

Rapid network expansion, newly acquired or merged networks, may leave you with uncertainty about your overall environment. We can dig deep into your infrastructure with a comprehensive discovery of your IT network, document its current state, and conduct a performance analysis for each appliance for a holistic view. We help identify the equipment that should be upgraded and review performance issues, such as bottlenecks.

Once issues are uncovered or known issues are identified, we provide remediation plans to fix the problems, optimize your network’s performance, and increase your network capabilities. Let our experts help you define the right network architecture for your organization, implement it according to proven practices, and tune it for the applications and traffic patterns that exist in your environment.

Network Access

Network access can be simplified and secured with one network, one policy, and one management architecture. Our experts will take a holistic approach to design a network that provides wireless access that performs like wired, and effectively supports the policies that enable BYOD (Bring Your Own Device).

Our Networking Practice works closely with our Security Practice to create policy-driven, on-demand access solutions with built-in security layers and will help you not only optimize your environment and resolve capacity issues but also include security measures across all domains.

Collaboration

The social, mobile, collaborative world is upon us. Regardless of job function, organization, or industry, technologies to maximize your efficiency and ability to remain engaged are essential. Our team has guided organizations through the careful selection of the right unified communication and collaboration technologies that drive innovative efficiencies. Take the journey with us to find new ways to uncover and act on information that is often scattered across your organization.

We will work together with you to unify voice and video across your organization and build upon the existing foundation of your network infrastructure. We can also help you understand how to expand your existing network footprint to support the use of video and determine if your network is ready to support the real-time traffic and Quality of Service (QoS) necessary for these types of applications. With network weaknesses identified and remediated, we’ll help ensure your IT dollars produce maximum ROI while delivering high levels of performance.

For more information, visit www.connection.com/NetworkingPractice-ps
Our Expertise

Connection has qualified experts with decades of experience to help customers build the right solution stack for their organizations. Our team helps you discern the factors that should drive the architectural considerations that in turn should drive your investment. Today’s IT strategy is focused on outcomes, and there’s no greater source than the software that manages the data and yields the insights that influence our daily work.

Messaging Platform Services
A secure, reliable, and resilient messaging architecture is an essential asset for any entity to operate in today’s technology-dependent world. Let our experts help you choose the right messaging platform for your needs and implement it according to proven practices.

Whether you’re migrating to Office 365, upgrading your on-premises Microsoft Exchange infrastructure, or moving from a legacy to a modern messaging platform, our team can help. Once you’re up and running, we will further integrate and performance-tune it for the applications and traffic patterns that exist as well as anticipate change in your environment.

Infrastructure Software Services
Software versions change often. With every launch, upgrade, and end of support there is opportunity—from reconfiguration to redesign. Let our team of experts show you where your infrastructure would benefit from re-architecting the design and deployment of your Windows and Active Directory services.

Once new versions of the core services are in place, it’s time to modernize your Microsoft services design. Don’t miss this opportunity to leverage our team to show you how to get the most from your investment.

Application and Database Services
Today’s information architectures are built off of the applications that users navigate to create and manage data. That data then fuels decision-making, personalization possibilities, and ultimately the customer experience. From higher education institutions that want to deliver a great new admissions application to growing commercial entities that need to reach more consumers, the database is at the core of applications.

Our team of experts will ensure that you’ve implemented your database platform in the most scalable and proven pattern. If you need performance improvements, let us perform a health check to ascertain potential opportunities to improve and optimize. For example, if resiliency and failover are your priorities, let us design and build the solution that meets those specs.

Our Expertise

Connection offers a contemporary IT Service Management (ITSM) model, which includes service desk offerings, IT staffing, remote infrastructure management, and lifecycle services. Technology deployments, refresh/upgrades, move/add/change, maintenance, management, and disposal services are available as projects or as ongoing managed services. We also maintain configuration and depot services for network and end-user assets. Our robust Project Management Office and IT Infrastructure Library (ITIL) foundation ensures operational excellence throughout every engagement. With more than 97% of U.S. zip codes available for field services, support locations, and service desk operations nationwide, we are ready to provide service anytime, anywhere.

IT Service Management

Relevant forces such as aggressive application adoption, rapidly evolving infrastructure, end-user sophistication, and IT functions at the department level increase constraints on IT. The resulting adverse effects include the inability to sustain governance, difficulties safeguarding infrastructure, and challenges to maintain service level agreements. However, if you evolve service desk operations to an ITSM framework—including remote infrastructure management, provisioning, and asset management solutions—you gain a first line of defense to reclaim consistent support and visibility. Our single point of contact ITSM framework has proven successful for many IT leaders. As a national IT solutions provider, Connection will function as an extension of your IT department to deliver the ITSM Solutions that give you a measurable advantage.

Our team offers decades of experience through comprehensive, yet flexible, services:

- Service Desk
- Asset Management
- Remote Management

Technology Deployments

As a qualified extension of your IT department, we deliver lifecycle services from the data center to the desktop, nationwide. Solutions range from complete ITSM services to modular lifecycle functions, as required. Services can be executed on a per project basis or as an ongoing managed service in a very customizable and agile framework.

Services span:

- Configuration
- Logistics
- Refreshes
- Upgrades
- Installation
- Maintenance
- Disposal

IT Staffing Services

Hiring top IT talent is a crucial ingredient to success. Finding those individuals quickly saves time and money. Connection offers a full range of Technology Staffing Services to fit every organization and environment. Our experienced staffing experts can help you recruit the best candidates for any project and any timeline. With our Contract-to-Hire Staffing Service, organizations gain the freedom to make hiring decisions with confidence. Our recruitment team works with your hiring managers to identify the skills, traits, and experience your organization requires, and then we find the best candidates for the job.

Our offerings include:

- Contract
- Contract-to-Hire
- Direct Hire
- Payrolling Services

We can provide the expertise you need to remain productive, and focused on your job—without the wait, costs, or risks of traditional hiring.

For more information, visit www.connection.com/LifecyclePractice-ps

Our Lifecycle Services Delivery Model Is Your Foundation for Success:

- Proven Solutions—Reliable, measurable, and flexible services throughout the engagement process
- Win-Win Approach—The most flexible approach to solving IT needs and ensuring ongoing operational excellence
- Fully Integrated Offerings—From discrete lifecycle projects to ongoing deliverables to managed service level agreements including service desk, asset management, refresh cycles, and remote infrastructure management
- Project Management—Onboarding support, lifecycle implementation, and steady state operations in conjunction with service delivery teams
- Service Delivery Support—Highly effective service accountability, ongoing service execution, and continuous improvement
- Full Suite of Services—Extensive consulting, engineering, process improvement resources, and customer advocacy to leverage optimal client outcomes and customer satisfaction
- WebSPOC™—This ITIL certified incident management system includes asset management, problem management, contract management, configuration management database, and overall ITSM framework
