Useful or Interesting Tools and Software
(Note: While some of these tools can be used easily via a web interface, or downloaded and run on your computer, a few of them require more complex setup and administration. They’re included here just to give you a sense of the range of tools available.)

Bamboo DiRT (Digital Research Tools) – extensive catalogue of tools for digital research and teaching
http://dirt.projectbamboo.org

Juxta – software for comparing and collating texts
http://juxtapost.com
Voyant – collection of tools for examining texts (word frequencies, word clouds, etc.)
http://voyant-tools.org

HumViz – portal to software and online tools from the Experimental Reading Workshop
http://humviz.org

Omeka – platform for creating collections and exhibits
http://omeka.org

NeatLine – construct annotated timelines and narratives using historical documents, maps
http://neatline.org

Scripto – community transcription tool
http://scripto.org/

Anthologize – plugin for WordPress blogging platform, allowing for publication of electronic texts
http://anthologize.org/
