Questions to Consider when Developing an Education Plan

- What aspect of your research will you integrate into your education plan?
- What will the overall theme for your Education Plan be? (e.g. Advancing discovery while promoting teaching, training and learning; Broadening participation; Enhancing research and education infrastructure; Broadly disseminating results; Benefits to society)
- What audience(s) are you targeting? (e.g. Diverse or under-represented groups, Undergrads, Grad students, K-12 students or teachers, Researchers, The community / broader public, Policymakers)
- How will you recruit your proposed audience to your project? (Do you already have existing relationships with this audience? If not, are there resources on campus that can help you establish these relationships? e.g. Broader Impact group)
- How will your grant activities impact this audience? How will you measure your impact?
- What other groups/initiatives/centers on campus can you connect with to improve the success and impact of your efforts?
- What are 2-3 main objectives for your education plan?
- What are 2-3 outcomes that will come out of your plan?
- How are you going to implement your plan? What evidence can you provide that you have the capabilities and resources to carry out your plan? What specific resources will you request in the grant proposal to carry out your plan?
- How will you evaluate the success of your education plan and measure achievement of your expected outcomes?
- What resources or help do you need to develop a solid BI plan?
