

Research Requirement for Biochemistry ScB Seniors AY 20-21 - For the class of 2021, the two semester research requirement may be satisfied by any two of the following opportunities. Students should discuss alternative arrangements directly with their concentration advisor to obtain approval.

- BIOL 1950 independent study course (in person or remote).
- BIOL 1960 independent study course (in person or remote).
- CHEM 0970 independent study course (in person or remote).
- CHEM 0980 independent study course (in person or remote).
- Independent study course in a related discipline (i.e. STEM disciplines, ENVS, PHP, etc.) if the project is relevant to the student's learning goals in the concentration.
- A summer research experience equivalent in scope and scale to work the student would pursue in a Biology independent study course. Examples include UTRAs, LINK awards, approved research programs at other institutions, etc. As typical of the Biology ScB, these experiences do not count as a course in the 10 course core requirement, but they can be used to satisfy the one semester of the research requirement.
- Other equivalent opportunities not listed - with approval from the concentration advisor and Dean Smith.
