COE Speaker Series—November 16, 1:00pm

What Does Innovation Have To Do With Harmonious or Acrimonious Trading?

Dr. Sadeg M. Faris
Chairman and CEO
Reveo, Inc.

Sometimes described as the “Einstein of the 21st Century,” Dr. Faris—an innovative scientist with over 500 patents issued and pending—founded Reveo, Inc. in 1991. Its mission is to invent, develop and market “Reveolutionary” frontier technology to commercialize products that solve problems for humanity, or as Dr. Faris calls it, “inventQbation.” Following along this mission, Dr. Faris has focused much of his work on tackling technological problems in developing countries, nurturing inventQbations that would attempt to close the often widening gap between the technology haves and have-nots.

On November 16, Dr. Faris will discuss the challenges that arise with a growing disparity between these two groups and how this leads to instability and “technology colonization” in trading. Dr. Faris will also highlight lessons learned as a result of a recent case study involving a failed experiment by the government of Malaysia to achieve technology sovereignty.

When: Thursday, November 16 at 1:00pm
Where: Barus & Holley, room 190
Host: Gregory Crawford (Gregory_Crawford@brown.edu)
