Brown University
Department of Chemistry

Undergraduate Research Students Authorization Form

The policy of the Department of Chemistry with respect to undergraduate research students is as follows:

1.) Under no circumstances is an undergraduate student permitted to perform laboratory work without the immediate supervision by a faculty member, graduate student, or other authorized person.

2.) Keys are issued for access only to the rooms of your research group.

3.) During non-University work hours, do not open exterior or interior building doors, or allow unauthorized individuals access to the building.

4.) At completion of research study, all keys must be returned to GC201.

These policies are designed with the safety of the student as the paramount concern. It means that undergraduates may not work alone in the laboratory at any time. Work during evening hours and during weekends is permitted, provided the required supervision is available.

Please sign and date below to indicate that you have read and understand the policy.
