Year 4	Complete additional chemistry or other courses, Interviews at schools and decisions	Interviews at schools and decisions

*\*Neither plan includes courses for the English requirement or the social and behavioral sciences necessary for the MCAT. Also, requirements are not always uniform from school to school. If you need to complete additional requirements, we suggest doing so during senior year. If you wish to study abroad, junior year or a summer may be optimal. No courses completed abroad count for admission requirements. Plan your course work, activities, and MCAT accordingly. Approximately two-thirds of Brown applicants follow the Four Year Plan. Nationally 63% of applicants admitted to MD programs followed a 4-year or longer plan.*

*\*\*Sample II of the Four Year Plan: You will be covering PHYS 0040 content knowledge while studying for the MCAT or DAT. Take the exam as late as feasible in the spring so you gain the knowledge you need.*

*\*\*\*Sample II of the accelerated Three Year Plan: Because BIOL 0280 is necessary for the MCAT it is highly inadvisable to study for or take the MCAT before completing the course. This sample is better suited to applicants to other health professions programs.*
