

## Sc.B. in Computational Biology

This contract must be completed with your advisor and have him/her/them sign it. Check off the boxes that correspond with each completed course. Check off **ONLY** those courses used for this concentration. Any changes to your contract must be initialed by your advisor beside each course that has changed. This contract must be reviewed yearly. If there are no changes, review is still required but approval is automatic.

**Student's Legal Name:**

**Graduation Year:**

**Advisor's Name:**

**Semester Taken:**

**Advisor:**

### PREREQUISITES:

MATH 0100:	Introductory Calculus II	Fall	_____	_____
	OR			
MATH 0170:	Advanced Placement Calculus	Fall	_____	_____
BIOL 0200:	Foundation of Living Systems	Spring	_____	_____

### GENERAL CORE REQUIREMENTS:

#### BIOLOGY –

BIOL 0470:	Genetics	Fall	_____	_____
BIOL 0280:	Introduction to Biochemistry	Spring	_____	_____
	OR			
BIOL 0500:	Introduction to Cell Biology	Spring	_____	_____

#### CHEMISTRY –

CHEM 0330:	Equilibrium, Rate and Structure	Fall	_____	_____
	OR			
CHEM 0350:	Organic Chemistry	Fall	_____	_____

#### COMPUTER SCIENCE –

CSCI 0150:	Introduction to Object-Oriented Programming and Comp. Science	Fall	_____	_____
	AND			
CSCI 0160:	Introduction to Algorithms and Data Structures	Spring	_____	_____
	OR			
CSCI 0170:	CS: Integrated Approach I	Fall	_____	_____
	AND			
CSCI 0180:	CS: Integrated Approach II	Spring	_____	_____
	OR			
CSCI 0190:	Programming with Data Structures and Algorithms	Fall	_____	_____
	AND			
CSCI _____:	(0320, 0330, 0510, or any 1000-Level CSCI Course)	Spring	_____	_____
CSCI 0220:	Introduction to Discrete Structures and Probability	Spring	_____	_____

## **PROBABILITY AND STATISTICS –**

APMA 1650:	Statistical Inference I	Fall	_____	_____
	OR			
CSCI 1450:	Introduction to Probability and Computing	Fall	_____	_____
	OR			
MATH 1610:	Probability		_____	_____

## **COMPUTATIONAL BIOLOGY CORE COURSE REQUIREMENTS:**

CSCI 1810:	Computational Molecular Biology	Fall	_____	_____
APMA 1080:	Statistical Inference in Molecular Biology and Genomics	Fall	_____	_____

## **CAPSTONE EXPERIENCE –**

Students enrolled in the computational biology concentration will complete a research project in their senior year under faculty supervision. The themes of such projects evolve with the field and the technology but should represent a synthesis of the various specialties of the program. The requirements are either one semester of reading and research with a CCMB faculty member or approved advisor, or a 2000-level computational biology course.

### *Supervised Reading and Research:*

---

Advisor Name	Advisor Signature	Semester and Year
--------------	-------------------	-------------------

### *OR a 2000-Level Course:*

---

Course Number	Course Title	Semester and Year	Advisor Initial
---------------	--------------	-------------------	-----------------

## **HONORS –**

In order to be considered a candidate for honors, students will be expected to maintain an outstanding record, with no “C” in concentration courses and with a minimum of an “A-” average in concentration courses. In addition, students should take at least one semester—and are strongly encouraged to take two semesters—of reading and research with a CCMB faculty member or approved advisor. Students must submit to a public defense of their theses to be open to the CCMB community. Students seeking honors are advised to choose a Thesis Advisor prior to the end of their Junior year at Brown. Students must complete the Registration form for Computational Biology and submit it to [CCMB@brown.edu](mailto:CCMB@brown.edu). Any deviation from these rules must be approved by the Director of Undergraduate Studies, in consultation with the student’s advisor.

## SPECIALIZED TRACKS:

Students must complete courses in one of the following tracks: Computer Science, Biological Sciences, or Applied Mathematics and Statistics.

### COMPUTER SCIENCE –

Students must complete three of the following courses:

CSCI 1230:	Introduction to Computer Graphics	Fall	_____		_____
CSCI 1270:	Database Management Systems	Fall	_____		_____
CSCI 1410:	Introduction to Artificial Intelligence	Spring	_____		_____
CSCI 1550:	Probabilistic Methods in Computer Science		_____		_____
CSCI 1570:	Design and Analysis of Algorithms	Spring	_____		_____

OR other Computer Science courses approved by the concentration advisor:

CSCI _____:			_____		_____
CSCI _____:			_____		_____

AND complete three of the following courses:

CSCI 0330:	Introduction to Computer Systems	Fall	_____		_____
	OR				
CSCI 0320:	Introduction to Software Engineering	Spring	_____		_____
CSCI 1820:	Algorithmic Foundations of Computational Biology	Spring	_____		_____
PHP 2620:	Statistical Methods in Bioinformatics	Spring	_____		_____
APMA 1660:	Statistical Inference II	Spring	_____		_____
BIOL 1430:	Computational Elements of Molecular Evolution		_____		_____
BIOL 1465:	Human Population Genomics	Fall	_____		_____
APMA 1690:	Computational Probability and Statistics	Fall	_____		_____

### BIOLOGICAL SCIENCES –

Students must take at least four courses comprising a coherent theme in one of the following areas: Biochemistry, Ecology, Evolution, or Neurobiology:

---

Course Number	Course Title	Semester and Year	Advisor Initial
---------------	--------------	-------------------	-----------------

---

Course Number	Course Title	Semester and Year	Advisor Initial
---------------	--------------	-------------------	-----------------

---

Course Number	Course Title	Semester and Year	Advisor Initial
---------------	--------------	-------------------	-----------------

---

Course Number	Course Title	Semester and Year	Advisor Initial
---------------	--------------	-------------------	-----------------

AND at least two of the following courses:

CSCI 1820:	Algorithmic Foundations of Computational Biology	Spring	_____	_____
PHP 2620:	Statistical Methods in Bioinformatics	Spring	_____	_____
APMA 1660:	Statistical Inference II	Spring	_____	_____
BIOL 1430:	Computational Elements of Molecular Evolution		_____	_____
BIOL 1465:	Human Population Genomics	Fall	_____	_____
APMA 1690:	Computational Probability and Statistics	Fall	_____	_____

### **APPLIED MATHEMATICS AND STATISTICS –**

Students must take three of the following courses:

APMA 1660:	Statistical Inference II	Spring	_____	_____
APMA 1690:	Computational Probability and Statistics		_____	_____
CSCI 1410:	Introduction to Artificial Intelligence	Spring	_____	_____
APMA 0340:	Methods of Applied Mathematics I, II		_____	_____
APMA 0330:	AND Methods of Applied Mathematics I, II		_____	_____
	OR			
APMA 0360:	Applied Partial Differential Equations I		_____	_____
APMA 0350:	AND Applied Ordinary Differential Equations I		_____	_____

AND at least three of the following courses:

BIOL 1430:	Computational Elements of Molecular Evolution		_____	_____
CSCI 1820:	Algorithmic Foundations of Computational Biology	Spring	_____	_____
PHP 2620:	Statistical Methods in Bioinformatics	Spring	_____	_____
APMA 1070:	Quantitative Models in Biological Systems		_____	_____
BIOL 1465:	Human Population Genomics	Fall	_____	_____

## STUDENT ACKNOWLEDGEMENT:

The above is my plan for meeting the degree requirements. It is my responsibility to make certain that all courses taken at Brown University for concentration credit, all courses taken at other institutions for which transfer credit has been approved for concentration credit, and all advanced placement credits appear correctly on my transcript.
