Please note that the deadline for internship applications has been moved up to November 1

Dear Anna Aizer,

I am writing to request your assistance in finding talented undergraduates for the Summer Analyst Internship position at the Federal Reserve Bank of New York. Your familiarity with the top students in your department will be of tremendous help in this effort.

The Summer Analyst Internship program provides undergraduates an opportunity to learn about and contribute to the work done by the Research and Statistics Group. Over the course of the summer, our economists-whose specialties include banking and payment systems, capital markets, international economics, macroeconomics, and microeconomics-work closely with Summer Analysts on long-term, academically orientated research projects as well as current public policy work.

In addition to their daily responsibilities, summer analysts attend events and weekly presentations hosted by senior management. These presentations provide a broad and extensive overview of the Bank's responsibilities and operations. As well as serving as a prime learning opportunity for undergraduates interested in economic research, the summer analyst program also establishes a strong pool of candidates for recruitment into the full-time Research Analyst position at the FRBNY upon graduation.

We seek candidates who have records of superior scholarship and academic curiosity. Summer Analysts usually come from strong economics, policy, mathematics, or computer science backgrounds, though a major in one of these fields is not a necessity. Successful candidates often have previous research experience, and many are considering careers in economic research, public policy, or other related fields.

In addition, we seek candidates from a wide range of backgrounds that are typically underrepresented in economics. It is important to us that we succeed in recruiting a diverse cohort of summer analysts each year. Thus we encourage many students with varying experiences and backgrounds to apply. As a representative of your institution and student body, we ask that you please help us in passing this message along to any candidates you may know who may be otherwise hesitant to apply.

Attached to this email, you will also find a brochure with details about the full-time Research Analyst position, which the Summer Analyst position is largely modeled after. Applications for the Summer Analyst position are being accepted now until November 1 at http://www.newyorkfed.org/careers/current_opportunities.html.

The Summer Analyst position is an unparalleled opportunity to work with a world-class research and policy team. We would greatly appreciate your encouragement of bright and interested students to apply.

Sincerely,

NY Fed RA Recruiting Team

Note: Information about citizenship and eligibility requirements are provided in the job posting at http://www.newyorkfed.org/careers/current_opportunities.html.
ECONOMIC RESEARCH AT THE FEDERAL RESERVE BANK OF NEW YORK

Economists at the New York Fed conduct innovative research and provide policy-oriented analysis to help guide the Federal Reserve’s assessment of the economy and the formulation of monetary policy—and there’s an opportunity for you to play a role.

Each year the Bank seeks roughly twenty exceptional college graduates with a strong background in economics, mathematics, and statistics to work as Research Analysts (RAs). Many of these new hires have previously worked as interns in the New York Fed’s Undergraduate Summer Analyst Program.

ABOUT THE POSITION

RAs are primarily responsible for:

- Assisting economists in the analysis of current public policy issues and events
  RAs help economists conduct current analysis and other short-term research on monetary policy, bank regulation, payments systems, financial markets, and the state of the U.S. and global economies. Current analysis often culminates in reports or presentations to the Bank’s president and senior management.

- Assisting economists in long-term, academically oriented research projects
  RAs help economists plan and execute long-term research on a wide range of applied and theoretical topics. Many RAs have the opportunity to coauthor scholarly articles.

“I CAN VOUCH FOR THE DRAMATIC IMPROVEMENT IN MY PROGRAMMING AND DATA ANALYSIS SKILLS SINCE STARTING AT THE FED.”

- Eilidh Geddes
  Capital Markets
DAY-TO-DAY ACTIVITIES INCLUDE:

- Performing econometric, computational, and analytical research intended for inclusion in Bank publications as well as academic journals
- Programming in statistical packages, such as SAS, Stata, MATLAB, R, and Julia
- Running financial, banking, macroeconomic, and international forecasting models
- Reviewing and organizing economic and financial data
- Compiling and assessing information from academic journals, market sources, and government reports
- Writing or assisting with reports and presentations on current economic and financial conditions and policy issues
- Developing spreadsheet/web macros and programs to facilitate and improve data manipulation and analysis
- Preparing background materials for and assisting in the formulation of senior management briefings
- Attending presentations given by New York Fed economists and visiting scholars

HARRY WHEELER
International Research

Working closely with economists and other RAs has taught me the ins and outs of the research process: what types of questions to ask, what sources of data to use, what type of models to employ to answer the questions under consideration, and how to present the results in a meaningful way. Being given the responsibility to contribute to these issues personally, as well as learning how to organize and develop research projects, has provided me with indispensable tools for future research after the Fed.
TUITION ASSISTANCE PROGRAM
Research Analysts receive generous tuition reimbursement for coursework and degree programs at nearby universities—including Columbia and NYU. The New York Fed’s strong emphasis on work/life balance helps ensure that RAs have the time they need to pursue coursework in economics, mathematics, statistics, finance, or related fields.

BENEFITS AT A GLANCE
- Competitive starting salary
- Flexible work schedule
- Tuition assistance
- Matching 401(k) savings plan
- Health, dental, and vision insurance
- Commuter benefits

JOB REQUIREMENTS
RESEARCH ANALYSTS
- Bachelor’s degree in economics, mathematics, statistics, or a related field
- Experience with large databases and statistical packages (for example, SAS, Stata, and MATLAB)
- Strong analytical and decision-making abilities
- Ability to provide effective verbal and written analysis
- Legal authorization to work in the United States on a multiyear basis for other than practical training purposes

UNDERGRADUATE SUMMER ANALYSTS
- Completion of at least the sophomore year of college by the beginning of the internship
- Demonstrated interest in banking, business, economics, public policy, risk management, or finance with a strong academic record
- Excellent interpersonal and written communication skills
A CAREER PATH

Research Analysts have gone on to enter prestigious academic programs and accept challenging positions in business and nonprofit organizations.

Ph.D. programs in economics, finance, or statistics
Berkeley, Chicago, Columbia, Cornell, Harvard, MIT, Northwestern, NYU, Princeton, Stanford, Yale, Wharton

Master’s programs in public policy
Berkeley, Chicago, Columbia, Cornell, Harvard, Princeton, Yale

Master’s programs in business administration
Chicago, Columbia, Harvard, MIT Sloan, NYU Stern, Stanford, Wharton

Federal Reserve Bank of New York
Chief of Staff’s Office, Financial Institution Supervision, Integrated Policy Analysis, Markets Group, Risk Group

Business
American Express, BNY Mellon, Goldman Sachs, JPMorgan Chase, Knewton, MKP Capital Management, NERA Economic Consulting

Nonprofit organizations

Law and public service
Berkeley, Chicago, Columbia, Harvard, Michigan, NYU, Yale, IMF, Peace Corps

EXPERIENCE THAT COUNTS

“BEING AN RA AT THE NEW YORK FED AFTER COLLEGE WAS ONE OF THE BEST DECISIONS I MADE TO PREPARE FOR A PH.D. IN ECONOMICS. THE HANDS-ON EXPERIENCE OF EMPIRICAL WORK PREPARED ME TO IMMEDIATELY START WORKING ON MY OWN RESEARCH AS SOON AS I STARTED GRADUATE SCHOOL.”

- Paul Goldsmith-Pinkham
New York Fed Economist

The New York Fed’s main building in the financial district of Manhattan
AREAS OF RESEARCH

Research Analysts join one of seven areas within the Research Group that conduct both policy-oriented analysis and long-term research. RAs generally stay in the position for two years.

CAPITAL MARKETS

Focus: Asset pricing; financial market liquidity; the interaction between markets, institutions, and economic fundamentals

Select Research Topics:
- links between financial markets and the macroeconomy
- estimation of risk premia in stock, bond, real estate, and derivatives markets
- interaction between the balance sheets of financial institutions and market liquidity
- financial market stress, volatility, and the measurement of systemic risk
- macroprudential policy and monetary policy

NEW YORK FED RAs HAVE A STRONG TRACK RECORD OF OBTAINING FELLOWSHIPS, INCLUDING EIGHT FROM THE NATIONAL SCIENCE FOUNDATION IN 2015-16.
FINANCIAL INTERMEDIATION

**Focus:** A range of issues relating to the behavior of financial institutions and the corresponding implications for borrowers, the health of the financial services industry, and the economy

**Select Research Topics:**
- stability of financial markets and institutions
- banking and the real economy
- financial system regulation and capital requirements
- corporate finance and corporate governance
- securitization and structured finance
- consumer finance protection and regulation

INTERNATIONAL RESEARCH

**Focus:** Open-economy macroeconomics, global finance, and trade; the monitoring and analysis of economic developments in industrialized countries; a range of international economic policy questions

**Select Research Topics:**
- macroeconomic spillovers and policy interdependence
- current account sustainability and global rebalancing
- European and Japanese economic issues
- commodity prices

MACROECONOMIC AND MONETARY STUDIES

**Focus:** Analysis of current national economic, fiscal, and monetary conditions; monetary policy guidance for senior management

**Select Research Topics:**
- forecasting and policy analysis using DSGE models
- learning and heterogeneous beliefs in macroeconomics
- monetary policy and inequality
- international spillovers and policy coordination at the zero lower bound

(CONTINUED ON NEXT PAGE)

ERICA MOSZKOWSKI

Macroeconomic and Monetary Studies

My biggest project has been to redesign and re-implement our team’s model in Julia, a new open-source computing language. I was extremely fortunate to have the opportunity to present that work at JuliaCon, a conference held at MIT.

As an RA with a computer science degree, I find it exciting to spend every day working with a cutting-edge technology and to participate in the development of high-quality open-source code for the academic economics community. Who says economists can’t be tech-savvy?
AREAS OF RESEARCH (CONTINUED)

- nowcasting and forecasting using large macroeconomic data sets
- models of the boom and bust in debt and house prices
- labor market churn, job and worker flows

MICROECONOMIC STUDIES

Focus: Applied microeconomics; labor economics; public finance; consumer finance; housing, urban, and health economics; construction and analysis of a wide array of micro data sets through the application of microeconomic theory and state-of-the-art econometric techniques

Select Research Topics:
- consumption, household balance sheets, consumer credit
- the formation and updating of subjective expectations and links to economic behavior
- macroeconomic and labor market impacts of the Affordable Care Act and other health policies
- skill and locational mismatch in the labor market
- empirical analysis of auctions
- evaluation of tax and labor market reforms

“AS SOMEONE INTERESTED IN PURSUING A PH.D. IN ECONOMICS, I’VE LEARNED HOW TO MANAGE THE MANY STAGES OF LONG-TERM RESEARCH PROJECTS BY WORKING ALONGSIDE ACADEMIC ECONOMISTS.”

-Philip Mulder
Money and Payments Studies
**MONEY AND PAYMENTS STUDIES**

**Focus:** The infrastructure at the heart of the financial system, including the interbank and money markets—such as the federal funds market, the repo market, and other over-the-counter markets—as well as payments and settlement systems

**Select Research Topics:**
- functioning of interbank lending markets
- effects of the Federal Reserve’s liquidity facilities on interbank markets and short-term interest rates
- implementation of monetary policy
- bank runs and crises of confidence in financial markets
- systemic risk and liquidity in large-value payments systems

**REGIONAL ANALYSIS**

**Focus:** Regional economics, with an emphasis on issues of interest to the Second District of the Federal Reserve System

**Select Research Topics:**
- human capital and local economic development
- microfoundations of urban agglomeration economies
- regional wage inequality
- geography of the housing boom and bust
- the labor market for recent college graduates after the Great Recession

**JACOB CONWAY**

Financial Intermediation

While working on various projects, I have also been able to attend frequent presentations of academic papers by Fed economists and visiting professors, take classes at NYU paid for by the Fed’s tuition assistance program, and work with and learn from my fellow RAs and the brilliant economists at the Fed. In so doing, I have improved my coding and analytical skills, familiarized myself with data sources and economic topics, and networked with current and future economists, all of which have better prepared me for economics Ph.D. programs and a career in economic research.

MACROECONOMICS AND GROWTH

INTERNATIONAL

MICROECONOMICS
While economists typically take the lead on most projects, there is a lot of room for smart and invested RAs to contribute and even produce original work. Even as a Fed intern in Microeconomic Studies the summer before I joined the Bank, I proposed, drafted, and helped finalize questions for a supplemental section of the Survey of Consumer Expectations (SCE), one of the major policy products of the New York Fed. The SCE elicits expectations from a nationally representative sample of American consumers on inflation, labor market variables, and household finance. The survey reaches up to 2,000 people and became the primary data set for my senior thesis.
