This event will be a talk and Q&A session with filmmaker Diana Toucedo about her film *Camille & Ulysse: Extracts from the Journal of Symlinguistics* (2021) which was produced in collaboration with the Centre Pompidou and the Centre de Cultura Contemporània de Barcelona, and is currently being shown in film festivals around Europe. *Camille & Ulysse* is based on the fictional works of philosophers Vinciane Despret (*Autobiographie d’un poulpe* [2021]) and Donna J. Haraway (“The Camille Stories,” *Staying with the Trouble* [2016]), who also lend their voices to the movie. The film follows the protagonists of the philosophers’ tales, Camille and Ulysse, as they navigate living on a planet undergoing massive extinction as members of the first generations of humans living in symbiosis with a species (respectively, the monarch butterfly and the octopus). It is filmed as an oral-tale and correspondence between the two narrators.

*Camille & Ulysse* will be available on Vimeo to the Brown community from November 29th to December 3rd. Please register for the Zoom event to receive viewing instructions.
