

*The Departments of Hispanic Studies and
Portuguese and Brazilian Studies invite you to
a celebration of Galician music:*

BALADAS DA GALIZA IMAXINARIA

Uxía and Narf, two of the most important and influential artists from Galicia (Spain), unite for the first time with *Baladas da Galiza imaxinaria* (Ballads of the Imaginary Galicia) to present a joint musical project that features classics from both musicians reinterpreting them, including poems by writers such as Rosalía de Castro, Castelao or Federico García Lorca, original compositions, and adaptations of traditional *alalás*, the oldest and best-known form of Galician music. They build bridges across cultures through music, and created their respective repertoires after years of traveling and exchanging experiences with artists from Angola, Brazil, Mozambique, Argentina, Portugal, Cape Verde, and Guinea-Bissau.
