Institute at Brown for Environment and Society (IBES) - Environmental Studies and Environmental Science Summer Research and Internship Awards

IBES is pleased to announce the availability of funding for summer research and internship experiences in fields relevant to the environmental studies and science concentrations at Brown. IBES expects to make up to 10 awards available for this coming summer.

**Eligibility:** These awards are available to Environmental Studies and Environmental Science concentrators who will be enrolled as juniors or seniors at Brown in the fall.

**Funding:** $3,500 stipend for research or an internship in the U.S.; $4,000 stipend for research or an internship abroad. Summer Earnings Waivers (SEW) are available to students who qualify.

**Restrictions:**

1. These awards are designed to fund substantive summer experiences that involve full-time or close to full-time commitments over an 8-12 week period. Partial funding can be awarded for shorter or less intensive experiences.
2. These awards may not be combined with other funding from Brown, such as UTRAs, Voss, Royce, or Link awards. Students receiving partial funding from an employer or provider of an internship or research experience may receive supplemental funding from IBES to bring the total summer stipend to the level of a regular stipend (i.e., $3,500 for a U.S. experience and $4,000 for one abroad).

**Application Due Date:** For full consideration, applications must be received by Monday, March 30. Pending available funding, applications will be considered on a rolling basis after that date.

**Application Instructions:**

1. Provide the name and contact information for the individual (e.g., a faculty member at Brown or another university) or organization that you plan to work with this summer.
2. Describe the level of commitment this individual or organization has made to you regarding the availability of a position with them this summer. For example, has your position been approved or are you waiting to hear back after applying for a position.
3. Describe the length of the position (number of weeks) and estimated number of hours per week that you expect to work with this individual or organization this summer.
4. Describe (in less than 300 words) the work associated with this position that you expect to conduct this summer.
5. Describe (in less than 300 words) how you believe this experience will benefit you academically and professionally.
6. List other funding sources you have applied for to fund this position (including pending applications).
7. Send application to jeanne_loewenstein@brown.edu by the submission deadline.
