Traditio & innovatio:
The Medical School was founded in 1419 as one of four founding faculties of the University of Rostock. Tradition and the ability to adapt to the needs of current society and its people are important key factors of the Medical School. The department actively works to promote development in research and teaching with exceptional results. High standards of medical training in small groups with great research opportunities and practical experience offer a special learning atmosphere to students. The medical faculty also offers a major in medical biotechnology, this rounds up a diverse educational offer for students.

Come and get an impression of the University and its Medical School in the lively student town of Rostock, in which tradition and innovation are combined successfully.

Living, visiting and studying in Rostock means Baltic Sea, beach, the river Warnow and all kinds of activities that go along with water. You will get to know some of the importance and the fun. Also, Rostock, located in northern Germany, offers a lot of cultural and social possibilities to its inhabitants, students and visitors. Well-known cities like Berlin, Hamburg and Copenhagen are easily accessible and you will find the Baltic Sea, the beach and wonderful nature even closer. Rostock, shaped by the medieval commercial union - called the “Hanse,” is an old charming hanseatic port town. With its 200,000 inhabitants, the city provides a great variety of bars, cafés and clubs to socialize. Additionally, the beautiful seaside resort of Warnemünde invites you to relax, go to the beach and enjoy a swim in the Baltic Sea. Come and still feel the old and new influence of seafaring, trading, shipbuilding, tourism and university life.

Curriculum:
This is a 14-day program, June 14-24, 2011. The program will include lectures in the morning located in our modern library next to the cafeteria where you can enjoy an excellent lunch. On some afternoons, you will have the opportunity to take part in practical work, hospital visits and/or case presentations.

Key topics:
- Demographic development
- Cell-biology basics and genetics of aging
- Aging of the sensory systems
- Perioperative and operative perspectives in aged patients
- Neurological and psychiatric aspects
- Tumors in aged patients
- Technical devices and support for the aging person
- Ethical aspects and cost development

Credits:
Medical students have the opportunity to earn credits.
- Rostock University Medical School Credit (ECTS)
- Brown University Medical School Elective/Independent Study Credit
- For students from other universities: please contact your academic advisor to discuss credit transfer options

Leisure and Social Activities:
Possible activities planned, organized and supported by students of Rostock Medical School
- trip to Berlin
- tour through Rostock & Warnemünde
- Dragonboat fun activity
