   (Course)

2. Student placed out of ________________________
   (Course)

   for the following reason:

   ____________________________________________________________________
   ____________________________________________________________________
   ____________________________________________________________________
   ____________________________________________________________________
   ____________________________________________________________________
   ____________________________________________________________________

________________________________________

(Signature) ____________________________

(Date) ____________________________

(NAME PRINTED)

*The Calculus Placement test is a self-graded, multiple-choice exam. The exam is completely optional. Your score will not be known to anyone but yourself. In particular, it will not be recorded or used for any official purpose. The Math Department will offer course recommendations based on your exam score. Clearly, those recommendations will be more reliable if you have done some reviewing before taking the exam. The results and course placement are purely advisory. The department doesn't keep a record of the results and will NOT complete a PLME Placement form based on the exam. http://www.math.brown.edu/~banchoff/CalcPlacement.htm
