Healthcare in America

*Pre-clinical Elective & Lecture Series*

Faculty Course Director: Eli Y. Adashi, MD, MS, CPE, FACOG
Former Dean, the Warren Alpert Medical School, Brown University

Interested in hearing from experts in health policy, technology, and administration?

Trying to discover career opportunities your M.D. can unlock outside of patient care?

Hoping to finally decode the health policy alphabet soup (ACO, DRG, SGR, and on and on)?

Through a series of ten dynamic and insightful lectures from renowned leaders in the fields of hospital administration, private insurance, public policy, and healthcare more broadly, this course promises to help answer these (and many other) questions.

As a group, the sessions (schedule at left) will provide attendees with the foundational knowledge needed to understand the complicated interplay between public, private, and individual actors in our current healthcare system. But beyond that, they serve as an opportunity to learn from and engage with the people and organizations working to improve a decidedly flawed but constantly evolving system through innovations in IT, provider reimbursement, patient safety, and much more.

Open to students, faculty, and staff across the entire Brown community, including its partner hospitals and the general public, the lectures will run from August through December 2016. First and second-year medical students can receive course credit by attending eight lectures.

Questions? Contact the faculty course director at Eli_Adashi@brown.edu or student coordinator at Jonathan_Staloff@brown.edu
