Cash transfers: Addressing structural determinants to reduce HIV risk in young South African women

Audrey Pettifor is an Associate Professor in the Department of Epidemiology at the University of North Carolina at Chapel Hill and faculty fellow at the Carolina Population Center. She has conducted research on sexual behavior HIV prevention in sub-Saharan Africa for close to twenty years with a particular focus on young women and structural interventions. Dr. Pettifor is PI of a large NIH funded randomized controlled trial in South Africa (HPTN 068)- run through the CPC-- which examined the impact of a cash transfer conditional on school attendance on HIV incidence among young women.
