i-BSHS Seminar Series:

Technology & Intervention Development

Computer Based Training in Cognitive Behavioral Therapy: From Design to Dissemination

Friday, November 1, 2019 ♦ 12:00pm – 12:55pm
121 South Main St, Room 245

Kathleen Carroll, PhD, focuses her work on implementation of evidence-based treatments for substance use disorders, including opioid use disorder, and the development of technology-based interventions to improve engagement and adherence to buprenorphine treatment.

Kathleen Carroll has had 35 years of continuous funding from NIH to support her research, including K05 (Senior Scientist) and MERIT (R37) awards. She is also Principal Investigator of the Center for Behavioral Therapies Development (NIDA P50 Center), now in its 25th year, and is co-PI, of the New England Consortium Node of NIDA's Clinical Trial Network since 1999. The author of over 320 peer reviewed publications as well as numerous chapters and books. Her major contributions include (1) articulating the Stage Model of behavioral therapies development, (2) developing behavioral interventions to improve adherence and outcome for pharmacotherapies, and (3) establishing the efficacy, durability, and specificity of computer-assisted training in cognitive behavioral therapy (CBT4CBT).

The **i-BSHS (Innovations in Behavioral and Social Health Sciences)** lecture series fosters collaborative discussion on innovative behavioral and social science-based approaches to improving population health.

Light refreshments will be provided, please feel free to bring your lunch as well.
