Disease Risk Exacerbation

Audience:

CAAS & CADRE Students, Staff, Post-
Docs, Researchers, and Faculty

Why Should You Get CPR Certified?

CPR, or cardiopulmonary resuscitation, is an emergent and often lifesaving procedure performed on a person who goes into cardiac arrest. Immediate and high quality CPR can double or triple the chance of survival after cardiac arrest. Learning CPR will prepare you to act quickly, confidently, and effectively in the event of a cardiac emergency.
