

THE TECHNOLOGY AND STRUCTURAL INEQUITY SERIES

Privacy and Surveillance

Wednesday, February 17, 2021 • 12:00 pm to 1:30 pm

The Technology and Structural Inequity series focuses on the impact of technology on marginalized communities. The series will bring together leading academics and activists whose work is influencing how we think about and how we fight against the harms that technology is causing. The speakers will examine how technology is being used to increase the surveillance and policing of marginalized communities and how many of these technologies are inherently biased and discriminatory.

This roundtable discussion on **privacy and surveillance** will feature:

Seny Kamara

Organizer & Moderator

Associate Professor of
Computer Science
Brown University
