A Science Center Undergraduate Fellow is usually sponsored by a regular faculty member who holds a teaching appointment in a science discipline at Brown University. The sponsor assesses the quality of the proposed project, provides guidance to the student during the course of the fellowship semester, and helps ensure that the student produces a learning activity or tool that promotes science learning.

Under exceptional circumstances, a Brown graduate student with appropriate expertise and teaching experience may sponsor a Science Center Fellow. In such cases, the proposal must be accompanied by the graduate student’s curriculum vitae and a statement of qualification and recommendation from the Chair of the graduate student’s department.

What will be your role as advisor to the student during the semester? How often will you meet with the student?

Please describe the work that the student will complete in the project.

Have you seen a final copy of the student’s proposal? Yes No

The faculty sponsor's signature on this form attests to his or her satisfaction with the academic content and procedures of the proposed project.
