

# Therapeutic Sciences Seminar Series

## Biotech Master Class

**Mahdi Fawzi, PhD**

### *“Bio Pharma R&D; Challenges & Opportunities”*

Dr. Mahdi Fawzi is an accomplished Senior Executive with over forty years of broad-based strategic experience in pharmaceutical R&D with a proven track record in creating a data-driven, effective global R&D vision. He has an established record of scientific, technical, and organizational achievements at all stages of the R&D process demonstrated at Proctor & Gamble, Warner-Lambert (Parke-Davis), Wyeth Pharmaceuticals, and recently at Tris Pharma and Warner Chilcott. He has significant expertise in small molecule biotech and vaccine development from the early discovery phase all the way to technology transfer and successful commercial launch. Over the years, he has provided the technical and organizational leadership for the development, patenting, and successfully filing global registrations for over fifteen well-established commercially successful products, such as Lipitor, Enbrel, Protonix, Neurontin, EffexorXR, Rapamune, Tygacil, Pristiq, Torisel, Acupril, Benefix, ReFacto, etc. He has authored over 50 publications and has been awarded more than 80 patents.
