This 180 hour RI accredited course introduces students to the foundational skills of out of hospital care, including assessment and basic life support for medical emergencies and traumatic injuries; medication administration; ambulance operations and major incident responses; and medical, legal, and ethical considerations of the EMT. Additionally, issues pertinent to community EMS services are explored in depth and emphasis is given to preparing EMTs to serve at Brown or a similar collegiate EMS community. Students who successfully demonstrate all standardized didactic and psychomotor knowledge and skill areas are eligible to take the NREMT practical and written exams required for EMT licensing in any US state.

Practical education includes:

- 3 hour cadaver lab
- 10 hour special rescue training
- 8 hour hospital observation time
- 12 hour ambulance ride along
