

# Does your child overeat?

Does your child eat when not hungry?

Seem to eat when upset or stressed?

If so, he/she **may qualify for a Brown/Lifespan study!**

- Participants must be ages 10-17
- Participants must be overweight

## What is involved?

- 2 outpatient study visits involving non-invasive procedures and testing
- Participants will be compensated for each study visit (2)
- Visits take place at the Weight Control and Diabetes Research Center and Brown University.

Please contact Erin! (401) 793-8962
