

## **SECTION 08 80 00: GLAZING**

### **1. GENERAL**

- A. Mirrors to have copper and paint back-coatings to protect the silver surface from tarnishing.
- B. Mirrors to be clipped and adhered to substrates.
- C. If glass entrances or wall systems are frameless, a form of visual identification is required at eye-level. Identification to be in the form of etching, graphic decaling or sandblasting.
