What aspects of the course did you like best? What did you like the least?

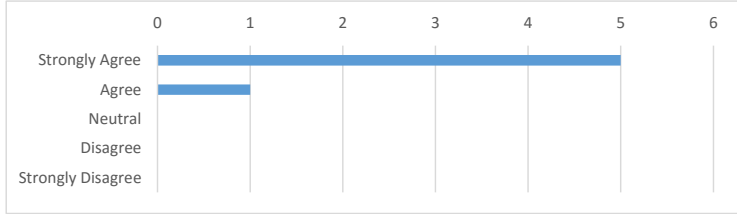

- 1) Enjoyed the opportunity to work in a lab but wish I more completely understood the lab procedures and data collected.
- 2) I enjoyed the hands on work we did in the lab. There was nothing about this course that I didn't not enjoy.
- 3) I very much enjoyed learning about Gaussian waves and seein the optics lab. I did feel that the course was rather hands-off
- 4) Being able to work in the lab and seeing what we learned in lectures realized in experiments. Setting up the experiments consumed a lot of time and didn't allow for much interaction; I would rather have had most of the experiment already set up so we could see the effects, get results and obtain data that we could further study in class

What about the instructor's teaching did you like best? What did you like least?

- 1) He had a lot of visuals and handouts to help us understand the course but he may have gone over some complicated topics a bit too quickly
- 2) He connected a complicated subject to more accessible concepts to make the lessons easier to understand

3) Mr. Mendis was usually very clear while explaining new concepts, although often much of what e said was repetitive

4) The instructor explain things very well and was very open to questions. He made sure everyone understood the topics he taught us. There was nothing in particular I didn't like about my instructor.
