

**Coeus 4.5.1.P3** is a Java application, which can be launched from a web browser or a desktop shortcut. It will run on any platform that supports the Java Runtime Environment (JRE) version 1.8.

The Coeus application authenticates using your Brown User ID and Password. To become an active user, you must first complete a CAP access request form and be set up in the system with the appropriate role(s).

Please see [IT Help Tickets](#) page to make a Coeus Access request.

---

**Hardware Recommendations:**

Processor speed of at least 2.0 GHz, and 512MB of RAM. Your computer display should be set to at least 1024x768 resolutions.

---

**System Requirements:**

**Windows Requirements:**

Browser: Firefox 4 or higher, IE 8 or higher. Coeus is untested on Opera or Safari on Windows.

Coeus 4.5.1.P3 requires Java Runtime Environment version 1.8

When you first log into Coeus it will detect any versions of Java you have on your computer. If you do not have the JRE 1.8, it will automatically install the current version of Java for you. You will need Administrative privileges to install the JRE. If you do not have administrative privileges on your machine, work with your DCC to install it.

**Mac Requirements:**

Browser: Firefox 4.0 or higher, IE 8 or higher, Safari 2.0.x (Mac OSX 10.4 or later) or 1.3.2 (Max OSX 10.3.9)

**Unix, Linux, Solaris Requirements:**

Coeus 4.5.1.P3 requires Java Runtime Environment and Java 1.8.

Browser: Firefox 4.0 or higher. Coeus is untested on Konqueror or Opera.

**Coeus Lite System Requirements:**

Coeus Lite is 100% web-based. It does not require any software installation on your PC, Mac or Sparc, and can be accessed using the Internet from any location.
