University Awards Ceremony:
A Celebration of Teaching

May 1, 2023 | 5 p.m.
Sheridan Center
Programs and Institutes

Data Science Course Design Institute, 2022
The Data Science Course Design Institute focuses on expanding knowledge of data science education strategies, integrating data science into existing course learning outcomes, and planning course-based data science activities.

Junior Faculty Teaching Fellows, 2022-23

This yearlong, cohort-based learning community provides the opportunity for a small group of junior faculty from across the disciplines to come together to reflect upon and discuss their teaching and their students’ learning with Sheridan staff.

Dean of the Faculty Awards

Presented by Dean Leah VanWey

Faculty Teaching Excellence Awards
The Faculty Teaching Excellence Awards recognize Brown faculty members for sustained and continued excellence in undergraduate teaching.

John Rowe Workman Award for Excellence in Teaching in the Humanities
Kate J. Schapira
Senior Lecturer in English

Elizabeth LeDuc Award for Excellence in Teaching in the Life Sciences
James R. Kellner
Associate Professor of Ecology, Evolution, and Organismal Biology and Environment and Society

Philip J. Bray Award for Excellence in Teaching in the Physical Sciences
Hui Wang
Associate Professor of Applied Mathematics

William G. McLoughlin Award for Excellence in Teaching in the Social Sciences
Holly A. Case
Professor of History

Dean’s Award for Excellence in Teaching
Kevin M. Mwenda
Assistant Professor of Population Studies (Research)
Interim Director, Spacial Structures in the Social Sciences

Rachel Wetts
Acacia Assistant Professor of Environment and Society and Sociology

Wenjun Zhao
LFZ Assistant Professor of Applied Mathematics
Dean of the College Awards

Presented by Dean Rashid Zia

**Henry Merritt Wriston Fellowship**

The Henry Merritt Wriston Fellowship is awarded to regular untenured members of the faculty (assistant professors and lecturers) who have achieved a record of excellence in teaching and scholarship during their first years at Brown.

- **Roman Feiman**
  Assistant Professor of Cognitive, Linguistic and Psychological Sciences

- **Fabrizio Fenghi**
  Assistant Professor of Slavic Studies

**Karen T. Romer Award for Excellence in Advising**

The Karen T. Romer Award was created in 2004 to recognize and reward excellence in advising by Brown faculty. The prize was established by the family of trustee Marty Granoff and is named for a former Associate Dean of the College who was a creative and passionate advocate for undergraduate education.

- **Dawn King**
  Senior Lecturer in Environment and Society

**Meenakshi Narain Excellence in Research Mentoring Award**

The Meenakshi Narain Excellence in Research Mentoring Award recognizes faculty members for their excellence in mentoring undergraduate researchers, as well as for their promotion, encouragement and training of diverse students in undergraduate research.

- **Karen M. Fischer**
  Louis and Elizabeth Scherck Distinguished Professor of the Geological Sciences

- **Paul B. Greenberg**
  Professor of Surgery

- **Brenda M. Rubenstein**
  Associate Professor of Chemistry

- **Parker VanValkenburgh**
  Associate Professor of Anthropology
Swearer Center for Public Service Awards

Presented by Vice President for Community Engagement and Stark Family Executive Director of the Swearer Center Mary Jo Callan

Howard R. Swearer Engaged Faculty Award for Teaching

This award recognizes innovative pedagogy that produces high-impact learning experiences and collaborative educational partnerships that address major social challenges and contribute to tangible public benefit.

Dawn King
Senior Lecturer in Environment and Society

Howard R. Swearer Engaged Faculty Award for Research

This award honors faculty whose research engages community partners in reciprocal relationships to co-produce knowledge, resulting in public value and recognizable scholarly impacts in their field(s) of inquiry.

Linford D. Fisher
Associate Professor of History
Dean of the Graduate School Awards

Presented by Interim Dean Thomas (Tal) Lewis

Graduate School Faculty Award for Advising and Mentoring

The Graduate School Faculty Award for Advising and Mentoring recognizes a faculty member who has made a significant contribution as an advisor and mentor to graduate students.

Kevin Quashie
Professor of English

Jessica Plavicki
Manning Assistant Professor of Pathology and Laboratory Medicine

Jerome Robinson
Manning Assistant Professor of Chemistry

Patrick Heller
Lyn Crost Professor of Social Sciences, Professor of International and Public Affairs and Sociology

Presidential Award for Excellence in Teaching

The Presidential Award for Excellence in Teaching recognizes outstanding pedagogical achievement by Brown University graduate students.

Olivia Lafferty
Doctoral Candidate in English

Haley Keglovits
Doctoral Candidate in Cognitive Science

Kristin Kimble
Doctoral Candidate in Earth, Environmental and Planetary Sciences

Kristen Iemma
Doctoral Candidate in American Studies
Dean of Medicine and Biological Sciences Awards

Presented by Dean Mukesh K. Jain

Dean’s Award for Excellence in Undergraduate Teaching, Advising and Mentoring in the Biological Sciences

This annual award recognizes a faculty member in the Division of Biology and Medicine for outstanding teaching, advising, and mentoring of students in the Undergraduate Divisional programs in the Biological Sciences.

Rebecca Kartzinel
Lecturer in Biology
Lecturer in Ecology, Evolution, and Organismal Biology

Dean’s Award for Excellence in Graduate and Postdoctoral Teaching and Mentoring in the Biological Sciences

This award recognizes a faculty member (campus or hospital-based) in the Division of Biology and Medicine for outstanding teaching and mentoring of graduate students and postdoctoral scholars.

Corey Ventetuolo
Associate Professor of Medicine
Associate Professor of Health Services, Policy and Practice

Dean’s Award for Faculty Research Mentoring in the Division of Biology and Medicine

This award recognizes a faculty member (campus or hospital-based) in the Division of Biology and Medicine for outstanding research mentoring of junior faculty.

Ghada Bourjeily
Professor of Medicine
Dean of the School of Public Health Awards

Presented by Interim Dean Ronald Aubert

The Dean’s Awards for Excellence in Teaching and Mentoring recognize outstanding contributions in teaching and mentoring of undergraduate and graduate students.

Dean’s Award for Excellence in Community Engagement
Rosemarie Martin
Associate Professor of Behavioral and Social Sciences

Dean’s Award for Excellence in Classroom Teaching
Madina Agénor
Assistant Professor of Behavioral and Social Sciences

Dean’s Award for Excellence in Mentoring
Jennifer Pellowski
Assistant Professor of Behavioral and Social Sciences

Dean’s Award for Excellence in Research Collaboration
Shufang Sun
Assistant Professor of Behavioral and Social Sciences
Dean of the School of Engineering Awards

Presented by Dean Tejal Desai

**Dean’s Award for Excellence in Teaching**
This annual award is presented to a faculty member in the School of Engineering in recognition of outstanding classroom teaching of undergraduate and/or graduate students.

**Vikas Srivastava**
*Howard M. Reisman Assistant Professor of Engineering*

**Dean’s Award for Excellence in Mentoring**
This annual award is presented to a faculty member in the School of Engineering in recognition of outstanding mentoring and advising of undergraduate students, graduate students, postdoctoral scholars, or junior faculty.

**Christopher Bull**
*Senior Lecturer, and Director of Brown Design Workshop*

**Dean’s Award for Impact in Diversity, Equity, and Inclusion in Teaching and Advising**
This annual award is presented to a faculty member in the School of Engineering in recognition of outstanding contributions to Diversity, Equity, and Inclusion in teaching and advising.

**Yue Qi**
*Joan Wernig Sorensen Professor of Engineering*
Division of Pre-College and Undergraduate Programs Award

Presented by Dean Adrienne Marcus

The Reginald D. Archambault Award for Teaching Excellence

The Reginald D. Archambault Award for Teaching Excellence recognizes Brown graduate students and post-doctoral fellows who provide thoughtful, responsive, and student-centered teaching to students in the summer programs. The award is named for Reginald Archambault, Professor Emeritus, former Chair of the Education Department and founding Dean of Summer Studies.

Gallery Images and Reflections

All photos by Martin Springborg

At this moment, a student is explaining why they predicted that bulb B would become brighter when I closed a switch in a circuit. The apparatus in the foreground and the equations in the background remind me that I want to help my students connect theory to real phenomena. The tallies of their predictions as well as the expression on my face remind me of how much learning what my students are thinking empowers me and brings me joy as an instructor.
Monica Linden
Distinguished Senior Lecturer in Neuroscience and Provost’s Faculty Teaching Fellow (2020-23)
NEUR 1540: Neurobiology of Learning and Memory (WRIT)
I chose this picture because it shows a learner-centric approach to classroom activities. We are all engaging with the student speaker, who, even though we can’t see them, clearly has the attention of the folks in the picture, including me. This is the type of collaborative learning that I hope to inspire in all the classes I teach.

Brad Gibbs
Urry and Comfort Family Lecturer in Economics and Provost’s Faculty Teaching Fellow (2022-25)
ECON 1760: Financial Institutions
I was intrigued by being photographed in the classroom for two reasons. Firstly, we rarely see pictures of ourselves at work, despite all the time and effort that we put into this aspect of our lives. My phone is chock-a-block with photos of family, friends, and places, but I doubt I have a single photo of where I teach, a departmental colleague, or my students. Secondly, I have been thinking a lot recently about bell hooks’s Teaching to Transgress. She makes a number of thought-provoking points about the performative nature of teaching and the need to be cognizant of how much body language conveys both intentionally and unintentionally. In this photo, the class seems engaged, I appear relaxed, and I am making eye contact with a student. However, that being said, I wish I wasn’t standing behind the lectern and monitor - I think I will organize the room to remove this barrier between the students and me next time…
Jonathan Readey  
Associate Director of the Nonfiction Writing Program and Senior Lecturer in English; Provost’s Faculty Teaching Fellow (2020-23)  
ENGL 0900: Critical Reading and Writing I: The Academic Essay  
In my English course, ENGL 0900: “Critical Reading and Writing I: The Academic Essay,” we seek to emphasize the ways in which students can be critical readers and writers of texts in their lives, from course readings to political speeches to the essays written by themselves and their peers. During the class reading discussion depicted in this photo, the students move simultaneously between different texts, from the original text in our course packet to a “reverse outline” of the text that they have written up for their homework to the notes that they are taking on a tablet during our discussion. Through such discussions, our class seeks to not only help students become critical consumers of all types of text and messaging in the world, but also to be able to move seamlessly through reading, writing, and thinking about different kinds of texts—in other words, to be able to make up their own minds in a world that is, like Brown, an ongoing Open Curriculum to be navigated.

Emily Kelejs Qazilbash  
Professor of Practice in Education and Provost’s Faculty Teaching Fellow (2022-25)  
EDUC 1320: Turning Hope into Results: The Policy Ecosystem of the Providence Public Schools District (COEX and CBLR)  
In my classes, students make sense of urban education policy by applying frameworks to readings and to their experiences in policy-making organizations and schools. I love the moments when students have grappled with materials on their own and in small groups and then come together with their diverse experiences to make greater meaning of what we know and don’t yet know about addressing sticky challenges in education. This image was captured as we converged as a full class after lively small group discussions. The photo evokes for me feelings of invigoration from a thoughtful, productive classroom discussion.
Emily Hipchen
Director of the Nonfiction Writing Program and Senior Lecturer in English; Provost’s Faculty Teaching Fellow (2022-25)

ENGL 0930: Introduction to Creative Nonfiction

I like this picture for probably quirky reasons; its composition intrigues me, the way the picture reflects the things we’re talking about at that moment. For instance, there is Elon’s water bottle, which is a narrative made up of its stickers (elements collected) that construct a narrative Elon hopes you’ll read for information about who she is. The bottle unpacks itself as a nonlinear narrative, a montage something like Eula Biss’s “Time and Distance Overcome” (one of the referents that day) that talks about the history of racial violence in the early twentieth century US by collecting factoids about telephone poles. Read like that essay, the bottle tells us a story. But then there’s the arc of the tables, which is a visual echo of the arc of a different structure, the linear chronological narrative. It curves and collects characters doing something, or about to—speaker (Elon), contemplator (Seema with her eyes on the text on her screen), listeners readying their responses or contemplating or reorganizing their own thoughts (Khaled and Sofia). This structure, the most common in all narrative writing, attempts a mimicry of time—a past before the speaker speaks, a present in which Elon is mid-speaking, a future in which there is response—here the eye traverses time as it follows the arc of the table across the picture.

That day we were addressing the structure of a chapter from Primo Levi’s The Periodic Table. The chapter stands in for the book, for any book, since it discusses carbon, the base chemical of the printed page on which it describes itself. This picture, made of light/dark—pixels on/off—has the same self-referentiality: it is structured of what it shows and what we are noticing about Levi’s work—the contrast on the page, ink on paper (light/dark). In looking at the photo, I had to remember that we were covering Levi. But once I did, the implications proliferated. How, I had asked, do you do this as writers, pack into so little space the whole (I probably gesticulated here) basic structure of life, which is carbon? How do you build a space so tight that opening that space offers much more than you know, even the unsayable, even a kind of absurdity? But here: this picture does that: those windows are open but they seem more like paintings than exits; everything crowds to the surface, the wall behind, the wall to the side, the table itself makes a boundary. But it unfolds itself as an image from a day on which we learned that this can be done meaningfully. For me, the image speaks what we’re doing, it structures itself as around the subject of that particular discussion. That’s what I like about it, why I chose it.
Sylvia Kuo
Senior Lecturer in Economics and Provost’s Faculty Teaching Fellow (2020-23)
ECON 0110: Principles of Economics

A view of me preparing my lecture through the doorway.

I like this photo because it is what I imagine students see when they enter the rotunda of the economics building, Robinson Hall. Because my office opens right into the rotunda, it captures a view of me, caught in the flow of running through my class in my head; it conveys the message to the student, right upon entry into the Economics Department, here is an Economics faculty member absorbed in trying to help you learn and grow.

Ruth Colwill
Professor of Cognitive, Linguistic and Psychological Sciences and Provost’s Faculty Teaching Fellow (2020-23)
CLPS 1195: Life Under Water in the Anthropocene (COEX & WRIT)

Members of CLPS 1195 (Ibrahim Ndiaye, Max Newman, Hope Nitza, and Jessica Tuchin) presented the results of their authentic research projects and fielded questions at the March 2023 annual meeting of the Eastern Psychological Association in Boston. On hand to provide support were Prof. Colwill and undergraduate TAs Mara Fong and Willian Silva. Course-based undergraduate research experiences like this one help to remove barriers to participation and to increase inclusiveness and diversity in STEM.
Amaya Allen ’25
Sheridan Center small-group tutoring
ECON 0110
Econ 0110 can be a pretty tough class. I’ve fallen in love with breaking down the material for my peers and striving to explain the concepts as clearly as possible. Here, I was drawing out the graphs that help to explain the cost decisions that firms make.

Linda Clark
Senior Lecturer and Director of Undergraduate Studies for Data Science Initiative
DATA 1150: Data Science Fellows (WRIT)
Students in DATA 1150 learn to follow a constructive approach to learning. This picture shows the small-group conversation, but also includes the ‘reporting out’ feature of being able to share each group’s thinking via a google doc. The google docs are a great way for me, as the instructor, to gauge where my students are in their learning.

Patricia Sobral
Distinguished Senior Lecturer in Portuguese and Brazilian Studies and and Provost’s Faculty Teaching Fellow (2020-23)
POBS 1080: Performing Brazil: Theater, Language, Culture (WRIT)
In this performance-based exercise, students walk about the performance space when I tell them that a storm is coming, and everyone creates shelter or shelters someone. I then ask them how it feels to find refuge or to shelter someone else. The questions keep changing since we do this exercise multiple times. It’s a community-building exercise that allows me to tailor the questions to our following text, as it is a pre-reading activity.
In this session of ENGL 1190M, Writing Fellows were engaging with various dimensions of the writing process. We used canonical readings to think about the writing process on two levels: microprocess (moving from thought to paper) and macroprocess (the development of a writer’s voice over time). Students were asked to critique the readings based on historical and theoretical frameworks we had laid out in the earlier weeks of the class. In small groups, they used various brainstorming and planning strategies to articulate their critiques—the activity was designed to help them both engage with the readings and develop concrete strategies for assisting writers at various stages of the writing process.

In this session of UNIV 1110, Problem Solving Fellows students engage with theoretical frameworks around teaching, learning, and problem solving to help them identify how they solve problems and how to construct effective problems. In this photo, students brought in a problem from one of their courses to dissect. Within this activity, Fellows identified the sources of knowledge used to solve the problem (epistemology); aspects of critical thinking necessary to solve the problem; as well as how the problem was defined. We then discussed if the problem accomplished what was intended and how it could be improved.
